ACQUITTED BY A JURY.

Embezzlement Case Against a Revenue Officer Failed.

SAN FRANCISCO, Oct. 15.—O. M. Welborne, ex-collector of internal revenue in this district, the Northern district of California, who has been on trial in the United States district court, Judge De Haven presiding, on an indictment covering forty-two distinct charges of embezzlement, was acquitted last night by the verdict of the jury. Welborne was relieved from office after an investigation conducted by Special Agent Thrasher, who was sent here from Washington for the purpose. Soon after the removal the United States grand jury found a true bill against him, and his trial was begun October 4. As collector of internal revenue Welborne had control of the salary and expense account as disbursing agent. It was charged that he carried men on the salary account who were not at work at the time, and that he paid others less than were charged to the salary account. The sums said to have been embezzled were all small, though the aggregate amounted to over $3,000. The case has been bitterly contested and the prosecution asserted that a conviction was certain, but the defense never lost hope and the result justifies their prediction that the ex-collector would be able to explain his conduct of the office.

FOR THE WORLD'S CHAMPIONSHIP.

Roeber and Wilmer Arrange a Graeco-Roman Wrestling Match.

CINCINNATI, Oct. 15.—Ernest Roeber of New York and Charles Wilmer of Cincinnati signed articles of agreement here last night for a Graeco-Roman wrestling match, in New York or Cincinnati next April; for the championship of the world. They are to deposit $250 each with Harry Weldon, sporting editor of the Enquirer, by February 15, and the other $250 two weeks in advance of the match. The date is to be fixed by Weldon when the first deposit is made. Ernst Roeber is here with Fitzsimmons, and claims to hold the championship of the world in wrestling. This is contested by Wilmer.

Proclamation of the Corean King as Emperor Confirmed.

WASHINGTON, Oct. 15.—The Corean legation received an official cable today, stating: "King proclaimed himself emperor from this date, October 15, 1897."

Gold Find in Wisconsin.

JANESVILLE, Wis., Oct. 15.—Gold has been found in Rock county, within eight miles of Janesville. Two farmers were in the city today with samples of gravel taken from the farm, which showed gold in fair quantities.

Chamber Suits.

NEW YORK CITY DRESSED BEEF.

NEW HAMPSHIRE GRANGE FAIR.

Manchester and Concord Want to Take it from Tilton.

TILTON, N. H., Oct. 15.—Manchester and Concord people are making a strong effort to secure the location of the New Hampshire state grange fair in one or the other of these cities. The principal reason urged for the change is that at either one of the cities named larger receipts would be secured. There is little probability that a change will be made, and the fair will continue to be held on the Tilton grounds.

Secretary Wadleigh of this town, when asked regarding the rumor of the proposed change, said: "I do not think there is any probability that the fair will be taken away from Tilton at present. The association has a lease of the present grounds for four or five years longer and will be very likely to continue the annual exhibitions where they are now held, at least until the lease expires. There will undoubtedly be a change in the conduct of the fair another season. Either the rate of admission will be raised or the premiums must be reduced. This is evident from the fact that the association for the last two or three years has been unable to pay its premiums in full. There is no inclination on the part of the management to change the location of the fair."

BROKE IN THREE SECTIONS.

Portland Express Freight Wrecked While on a Steep Grade.

ROCHESTER, N. H., Oct. 15.—The Portland express freight which reached this city from the east over the Portland & Rochester railroad at 11:10 o'clock last night was wrecked a short distance east of the Union station here. Seven cars were piled up and it was 9:25 this morning before the road was open to traffic. The loss is $10,000.

The train was heavily laden with paper, shipped from the Cumberland mills to Philadelphia and New York, and was drawn by two locomotives. While running down a steep grade the train broke in three sections. The locomotives stopped at the "Know Nothing" crossing near the station, and just as the engineers had decided to back the engines the middle section came along at a high rate of speed and crashed into the cars attached to the locomotives. Seven cars left the rails and were piled up in confusion, three being smashed to pieces. One of the cars struck a hand-car house near the scene, dragging it along for several yards. Part of the wreck brought up against a dwelling house abutting on the railroad. The house was slightly damaged. No one was injured, as none of the train hands happened to be on the wrecked cars. A wrecking crew worked all night clearing away the debris.

Charged With Burning a Mining Plant.

MOKELUMNE, Cal., Oct. 15.—Charles Harris, a pioneer gold miner, has been arrested, charged with having fired the stamp mill and hoisting apparatus of the Moser and Roanoke mine, which were burned Sunday afternoon, destroying $25,000 worth of machinery. Harris is a brother of the general superintendent of this and the Footo and Thompson mine, and was employed as watchman on the premises.

A Pawtucket Pension.

WASHINGTON, Oct. 15.—Original, widow's—Irene Arnold, Pawtucket.

Knights of Honor Relief in New Orleans.

NEW ORLEANS, Oct. 15.—The Knights of Honor here have organized a relief committee and notified the grand jurisdictions throughout the country that they are prepared to look after any members of the order that may be sojourning in this city during the prevalence of the fever, and see that fraternal care and attention be accorded such members as may become afflicted.

"LET ME!" "NO, ME!"

Despite the fact that the great majority of women feel their equality with men on all points, it must be admitted that in one particular, at least, they have not reached the heights of desired masculinity or brushed away completely the environment of tradition. This obstacle in their proud progress to the front ranks is a mere matter of car-fare—a trifle which it would seem could be easily dissipated, as trifles generally are, but which in feminine controversy as to who shall pay it assumes a dignity that benumbs all larger financial transactions, and for the nonce engrosses not only the attention of the two particularly interested ones, but all others who are within hearing of the sprightly argument that bids fair, like the brook, to go on forever.

It is a question whether the woman who declares "I have it right here" ever does have it at any getable place amid her draperies or the depths of her purse. The frantic efforts she makes to secure it would lead one to believe that she not only did not have it "right there," but that she was also skirmishing with time in order that her friend might have the rare privilege of putting the ten cents into the outstretched and impatient hand of the waiting conductor. As in years gone by, we again hear the insistent "Now let me." It sounds not a whit more sincere, not a whit less silly than when first it was uttered. That it is insincere in nine cases out of ten is evidenced by the relieved look on the face of the beaten member when she sees the dime safely out of her friend's purse instead of her own, and the indications of disappointment but thinly veiled by an artificial triumph in the countenance of the other.

Women may be progressive, but they haven't caught up to men yet in this particular. When they can without bluster or argument, with never a look of consciousness or the air of having bought a transcontinental house, pay each other's fare, showing neither pique nor pleasure as the result of their maneuvering, then and then only can they claim equality with their fathers, husbands, brothers and sweethearts.—[Philadelphia Times.

HARRISON'S "THIS COUNTRY OF OURS."

A former President of the United States in the role of an author is not a common thing, though it is by no means apparent why one who has occupied the chief executive's chair should not write an excellent book. This ex-President Benjamin Harrison has done in his "This Country of Ours," just issued from the press of Charles Scribner's Sons. Much the larger part of the contents of the volume appeared serially in the Ladies' Home Journal during last year and this, but the text has been carefully revised and new matter added. As outlined by the author, the work is "a modest attempt to give my readers a view of the machinery of our national government in motion, and some instruction as to the relations and uses of its several parts. * * * The purpose of the book is to give a better knowledge of things that have been too near and familiar to be well known. * * * I hope it may also tend to promote an intelligent patriotism and a faithful discharge of the duties of citizenship." Mr. Harrison's style is clear and direct, the arrangement of the material employed is admirable, and the book should prove very useful to a large class of readers. The work of the publishers has of course been done with good taste.

Second Edition.

SETTLING DOWN TO HARD WORK.

Attitude of the Germans in the New York Campaign Problematical.

NEW YORK, Oct. 15.—As election day draws nearer sensational surprises in the political contest grow scarcer, and hard work, extending from the house-to-house canvass to the huge mass meeting, becomes more noticeable. The announcement by Mr. Dayton of the Democratic-Democracy nomination for comptroller was discounted by his evident intention prior to the official announcement. None the less Mr. Dayton's campaign is watched with deep interest, and by some more anxiously than the Tammany sachems, who fear he will draw heavily from the votes of letter carriers and firemen and their numerous friends, who would otherwise vote for Van Wyck. It is announced that Messrs. George and Dayton will campaign together. Comment on the oddity of this is not wanting, as Mr. Dayton has not evinced the most peculiar talents which are believed to make for the peculiarity of the single taxer and free trader, and his friends say he will not do so.

The phrase "To —— with reform," used by Colonel Asa Bird Gardiner, the Tammany candidate for district attorney, in his mass meeting speech is likely to be quoted and commented upon. Colonel Gardiner says he used it as a quotation, and not as a party shibboleth. The opponents of Tammany do not accept this explanation.

The attitude of the Germans in this campaign may be learned when the ballots are counted; it cannot be accurately stated now. At last night's meeting of the executive committee of the German-American Reform Union resolutions favoring Van Wyck were tabled and Seth Low was endorsed. But the union does not include anything beyond a good-sized minority of the German-Americans, many of whom, pleased with the solomon's recognition on the Tammany ticket, will vote that ballot straight. Other Germans—bankers and wealthy business men—will support General Tracy, because of his views on finance, and still others, who believe the opinions of Henry George to be full of saving grace, will support that gentleman heartily. In short, the German-American vote in Greater New York, which many think will reach at least 125,000, will be divided on the lines of personal preference.

SEALING EXPERTS.

Representatives of England, Canada and America to Meet Soon.

LONDON, Oct. 15.—The British foreign office today intimated to the United States ambassador, Colonel John Hay, that a meeting of sealing experts of Great Britain, Canada and the United States will be called soon by the Marquis of Salisbury. It is learned that Professor Darcy Thompson, the seal expert of the British foreign office, will start for the United States immediately.

The Review of Reviews says that editor W. T. Stead, while in Washington recently, discovered that unless the sealing question is speedily settled the United States government will order the destruction next season of the entire herd of seals on the whole of the Pribyloff islands.

New York, Oct. 15, Normannia, from Hamburg.

Alleged American Embezzler Discharged in Halifax.

HALIFAX, Nova Scotia, Oct. 15.—The proceedings in the county court this morning in the case of Willis Trask of Wallingford, Conn., arrested on a charge of embezzlement, were very short. "We are not in a position to prosecute this matter," said City Recorder MacCoy when the court opened. "We cannot get witnesses we want from the United States." "I ask for the prisoner's discharge," said Trask's counsel. "I order the prisoner's discharge," remarked Judge Johnson, and that ended it. Trask walked out of court a free man.

British Government Will Maintain the Gold Standard.

LONDON, Oct. 15.—The Globe, which has close relations with the cabinet ministers, reiterates that the government may be depended upon to maintain the gold standard inviolate, and adds: "The views of individuals, whether in the ministry or in a back parlor, count for next to nothing."

Fatal Explosion of Mine Gas.

POTTSVILLE, Penn., Oct. 15.—An explosion of mine gas occurred at Kaska William colliery, near Middleport, last evening, which has resulted in the death of three men and the severe injury of three others. Patrick Sweeny was killed outright, and two men have died from the injuries received.

Sudden Death of a Tammany Candidate.

NEW YORK, Oct. 15.—Dr. James P. Daly, Tammany's candidate for the office of coroner in the borough of the Bronx, died of apoplexy this morning. Last night he spoke at two meetings.

HOLLAND'S QUEEN.

When the queen regent of the Netherlands opened Parliament at The Hague last month she stated that she hoped next September that function would devolve upon her daughter, Queen Wilhelmina, who will have attained her majority August 31, 1898, and have begun her reign.

E. W. LAWTON'S CARPET ROOM.

The young queen, who stood beside her devoted parent, blushed with becoming feminine modesty as the announcement was received with hearty acclamation.

The winsome Wilhelmina is undoubtedly one of the most interesting royal personages in Europe. Her charm of personality, her native wit, her unaffected dignity, her speaking a felicitous combination of the queen and the Holland maiden, and her good common sense, too often absent in such cases, have made her beloved not only by her own people but by foreigners and all others who have met her.

The past seventeen years have been years of anxiety and care to Wilhelmina's mother, Queen Regent Emma. The latter has since Wilhelmina's birth, August 31, 1880, lived in and for her daughter, the training of whose mind and the development of whose character have been the royal mother's only thought. From all that is to be learned about the young queen it would seem safe to predict that the parent's devoted efforts will be worthily rewarded.

During her earlier years Queen Wilhelmina's health appeared to be on the decline. Consumption was feared. Fortunately, by means of plenty of outdoor sport and athletic exercise she recovered her vigor, and now she possesses a physique which will compare favorably for robustness with that of most Dutch maidens of her age. Apropos of her enjoyment of open-air games, and as indicative of a democratic instinct, the story is told of her meeting a party of children playing snowball while she was driving with her governess. She insisted upon the carriage being stopped to see the fun, and nothing would satisfy her until her companion permitted her to dismount and enjoy the excitement of pelting snowballs herself at her youthful subjects, who, much to her delight, returned the compliment with equal spirit.

A patriotic young lady, too, is this little queen. During her history studies she was reading about the deeds of violence done in times gone by by the Spaniards in the Low Countries. Suddenly she exclaimed in a fine burst of indignation:

"Well, when I reach my majority and ascend the throne of Holland, if the King of Spain presumes me to invite him to my court he will be very much mistaken!"

"The English have not impressed Queen Wilhelmina too favorably, although she was very fond of her English governess, Miss Winter. The latter one day, gave her a map of Europe to draw. When the work was completed her youthful majesty had made Holland larger than Germany, while she had reduced England almost to a microscopic point.

When the Prince of Wales was presented a few years ago Wilhelmina was very much pleased with his manner toward her. As he was taking leave of her she said, with startling candor:

"You are indeed a most agreeable Englishman. I did not think there were any, to judge by the specimens we find in Holland."

To Select Her Own Consort.

The important question of the young queen's marriage is still unsettled. Several suitors for her hand have appeared, but so far she has discouraged them all. About a year ago it was announced that she had been betrothed to Prince Bernard of Saxe-Weimar.

The prince, who is two years Wilhelmina's senior, is shy and diffident and unattractive in personal appearance, and she protested against the suggestion of union with him, although her mother is said to have strongly favored it.

"I am in no hurry to wed," Queen Wilhelmina is quoted as saying, "and I propose to take plenty of time in selecting a husband. I endeavor to listen respectfully to my advisers, but they must not expect to have any voice in the matter when the question regards my marriage."

Wilhelmina is a young woman with a will of her own.

DEVELOPMENTS OF ELECTRIC MANUFACTURE.

Many years ago Lord Kelvin, in a memorable paper on using such powers as those of Niagara, hinted that resort to currents at a pressure of, say, 50,000 volts was as likely as the introduction of the buzz-saw into ordinary domestic economy. But long strides have been made since then, through his work and that of other men, and today electricians talk glibly of handling unconcernedly currents of 50,000 to 400,000 volts, which is nine or ten times the pressure common when Lord Kelvin made his famous remark. One of the results of this increasing pressure has been the hunt for better insulating materials. Mr. Edison says the search for a really good insulation is more difficult than was that for the best bamboo to make lamp filaments from. Just at present, in England considerable attention is being given to a fish-oil insulation, which when worked up into vulcanite is reported to withstand 50,000 volts very comfortably. Oil has long been used as an insulating liquid, and some of the high-tension "transformers" in use on modern long-transmission lines are immersed in it. But the claims put forward by Lord Kelvin for this new fish-oil preparation would suggest that possibly a further advance is in sight.

Although the crisp and tender celery is best served in its natural state, fried celery is an appetizing relish as a luncheon or supper dish. To prepare, cut pieces of the larger stalks in three-inch lengths. After wiping each piece dry, it should be dipped in egg, then in bread-crumbs, and fried quickly in drop fat in smoking hot fat. Remove to drain on some brown paper, and send hot to the table to eat with scalloped oysters or a chafing-dish service of creamed fish.

LINCOLN TERRITORY.

Probability That the Northern Part of Alaska Will Be Set Off.

[illegible] NEBRASKA, Alaska, Sept. 29, via Seattle, Wash. Oct. 14.—Lincoln territory will in all probability, before the adjournment of another Congress, have been created from the west [illegible] of Alaska. [illegible] which [illegible] and the movement has been on foot for that purpose have been explained in detail in the previous [illegible] Congressman [illegible]

The new territory will include the Yukon basin, from the international boundary line [illegible] to the Arctic coast on the west. The northern boundary will be the Arctic coast and the southern an irregular line from Mt. St. Elias to a point about midway between the mouth of the Yukon and the mouth of the Kuskokwim.

The subject of creating the territory was thoroughly discussed during a recent visit to New York by [illegible] and after [illegible] had conferred with many public men, including Speaker Reed, Chairman Sherman, Chairman [illegible] and Senator Cullom, [illegible] for Canada.

The immediate object of the proposed action is to establish a territorial government for the northern portion known as the Yukon basin. The organic act will be framed [illegible] and it is believed that such will not meet with any serious opposition. It would [illegible] and for Canada.

The question

ORIGINAL AND RECENTLY OPENED STREETS OF NEWPORT.

Tourists are often puzzled and not a little amused at the incongruity of the names of streets and thoroughfares through which they temporarily wander in their visits to various cities.

Haymarket square in London, in the midst of a dense population, gives no indication of its pastoral name, for probably not one of its teeming thousands ever inhaled the perfume of newly made hay, and scarcely ever beheld a vernal pasture. "Charing Cross," "Temple Bar," "The Seven Dials" and "Rotten Row" of the same city are misnomers, having apparently no significance.

The pretty suburban city a few miles from Philadelphia, called Germantown, possesses a remarkably picturesque street, lined with the houses of the wealthy, to which its citizens have given the very prosaic soubriquet of "Shoemaker Avenue."

Grange street, in a particularly unattractive portion of New York, and one of the entrances to the "Five Points," never suggests to the passer-by the thought of tropical orange groves or luxuriant fruit orchards.

Boston, conceited as the modern Athens, and jocosely spoken of as the "Hub of the Universe," has attained a world-wide celebrity for the crookedness of its thoroughfares, which are said originally to have been mere cowpaths. Two of its streets are named respectively "Winter" and "Summer," but the appellations seem to have no effect upon the rise or fall of the thermometer.

The earliest-laid-out streets of Newport received very practical names. Spring street was by the first residents spoken of as Back street; Frank street was called Old Church lane; the present Church street, New Church lane, and Mary street was known only as New lane.

In the "Point" district eight parallel streets are named after forest or fruit trees—Elm, Poplar, Chestnut, Cherry, Pine, Willow, Walnut and Sycamore.

Some of the newer avenues and streets have been complimentarily named for prominent men. These named in honor of Presidents are Lincoln and Garfield; of statesmen, Clay and Webster; of Rhode Island governors, Coddington, Bull, Wanton, Cranston, Gibbs, Burnside, Howard and Van Zandt, and Everett street is named in honor of a Massachusetts governor. Three mayors have left their impress upon Bellevue and Powel avenues and Calvert street, and two courts have been called after Atkinson and Rowse. Perry street is called after the hero of Lake Erie.

A pleasant avenue in the southern portion of the city, out of courtesy to our English residents, bears the name of the reigning Queen of Great Britain, while King street, now Franklin, was given this title out of respect to King George II. Duke and Marlborough streets are so called in compliment to members of English nobility, while Thames street was named after the river near the heart of London—the little, busy river which is dear to all Londoners.

Berkeley avenue and Whitehall street were respectively named after Bishop Berkeley and his country residence at Middletown.

Quiet little Green lane, where only a few years ago were meadows and pastures, with possibly two or three modest cottages, now glories in the name of Tilden avenue, so called after the late mayor and governor of the city and state of New York.

Kay, a long and possibly a little too deeply shaded street, was thus named out of grateful remembrance of Nathaniel Kay, who was a generous benefactor to Trinity Church at a time when pecuniary assistance was much appreciated.

Miantonomi avenue was named after a former Indian chief, whose wigwam was located at and his calumet or pipe of peace smoked on the summit of the hill of the same name.

Bath road is so named from its contiguity to the ocean, and Farewell street is appropriately so called from the fact that nearly all funerals returning from the cemeteries pass down this quiet thoroughfare.

Tanner street, now West Broadway, received its name because at the close of the last century three or four flourishing tanneries were in operation on that circuitous highway.

Broad street within a few years has been given the metropolitan title of Broadway, and its new designation gives to its upper portion a decidedly aristocratic atmosphere.

It is hoped and presumed that when other avenues and streets shall be opened special care will be taken that their names shall be equally musical and significant.

N.

ENGAGEMENT OF MISS PAULINE DRESSER.

The announcement was made here yesterday afternoon of the engagement of Miss Pauline Dresser, daughter of the late Colonel George W. Dresser, U. S. A., to Rev. Mr. Merrill of Tuxedo, son of Mrs. George Merrill. Miss Dresser is a granddaughter of the late Daniel Lelloy and a niece of Mrs. Edward King, and her sister, Miss Natalie Dresser, was married last month to Mr. John Nicholas Brown. Miss Dresser is guest of Mrs. Edward King. Mrs. Merrill owns a cottage, "Cozy Nook," on Bellevue avenue.

BARE FLOORS AND RUGS.

Women have long been instructed that rugs and bare floors are sanitary essentials in housekeeping. While this statement is undoubtedly true in many cases, it still admits of qualifications. In houses whose rooms have well-made hard-wood floors the arrangement proves satisfactory, though all women admit that it increases the household work. Good floors, however, are still the exception more than the rule. When a housekeeper attempts to stain and oil margins that are made of uneven, loosely-put-together boards, she finds that she has undertaken a considerable burden. Such floors almost never look well. They need the most constant care to be even of tolerable appearance. Wiping over once a day by no means keeps them in condition, particularly if, as is probable, the house in general be poorly built, with dust to rise from the cellar and enter through the windows by many cracks and ill-joined runners. More than one housekeeper certifies that under such conditions she has gone back to fitted carpets. These, it may be added, can be hygienically cared for by following the approved method of sweeping them. This is to brush the dust from the corners and use a carpet-sweeper to take it from the main space of the carpet, afterwards wiping it over with a clean damp, not wet, cloth.

Another point urged for the rug system, which experience does not bear out, is economy. Few maids can adequately clean the heavy rugs with which many apartments are strewn. They demand outside service about as frequently as does the fitted carpet. A New York woman who employed a handsome, up-town apartment, paid $2 a week throughout the year to have her rugs properly cleaned every Friday morning. It will be the wise housekeeper who will study the limitations of her residence before she decides in favor of bare floors.—[New York Post.

A RECEPTION GOWN.

Easily applied trimmings are eschewed by the Parisiennes, and the most elegant gowns appear with elaborate embroideries in silk, bullion, beads and spangles. The one shown in the accompanying illustration is lavishly embroidered in silks of many tints. The material is a soft, lustrous wool, of a peculiar shade of grey, having a tinge of green, and called peau de serpent, or serpent skin—not an attractive appellation, but a beautiful shade

The skirt is slightly draped in front, one side apparently overlapping, with a fold or two at the top, where dog-eared ends are caught in a buckle. The edges are bordered by astrachan fur. The waist has a plastron of white velvet embroidered and trimmed with astrachan. This plastron is cut out to show a glimpse of the white velvet, which is cut in one with a flaring collar which fastens at the left side. A cape of the wool, lined with white velveteen and trimmed with fur and embroidery, completes this elegant visiting costume. A black and white turban is worn with it.

LOCAL BRIEFS.

—Mrs. Colt of Hartford is visiting Mrs. C. N. Peach.

—Mrs. R. E. Darrah has recovered from a recent illness.

—Rev. W. S. Rainsford returned to New York this morning.

—Miss Mary Barrows of Freetown, Mass., is visiting here.

—Mrs. Gardiner B. Reynolds is very ill at her residence on Broadway.

—Mrs. Agnes Richardson is visiting her uncle, Mr. George W. Church, in Little Compton.

—H. J. Phillips of Salem, Mr. and Mrs. C. O. Morris and Mr. and Mrs. A. B. Carlton of Elizabeth, N. J., and Thomas Curtis of Brooklyn are at Kinzler's.

—Messrs. George L. Rives, Alexander Maitland and John L. Cadwalader have been appointed by the governors of the Consolidated Libraries of New York members of the committee of jurors to decide upon plans for the new library building to be erected in that city.

—The weekly rehearsal of the Philharmonic Society was last evening devoted to the study of a number of the more difficult choruses in the "Messiah," the different parts being read separately. During the intermission Misses Marian Dowling and Anna S. Kelly played the overture to "Ruy Blas," by Mendelssohn, to the evident enjoyment of those present.

PERSONALS.

...Tito Crespo, son of General Joaquin Crespo, president of Venezuela, died in Paris Thursday. He was thirty years of age.

...The will of the late Hon. Edward L. Pierce of Milton, Mass., who died recently in Paris, makes no public bequests, leaving a large fortune to his widow and children.

...It is stated that when Hon. Frederick Peters resigns the premiership of Prince Edward Island, a step which it is understood he intends to take very soon, he will remove to British Columbia and practice law there.

...Sir Henry Irving's sons are both possessed of literary ability. Lawrence Irving has written a Peter the Great drama, and this month's Nineteenth Century contains a clever and humorous article entitled "The True Story of Eugene Aram," from the pen of H. B. Irving.

...A cable from Rome says that when the pope received the Irish pilgrims Thursday morning he appeared to be in excellent health, the only difference in his appearance from last year being that he seems rather more bowed. His voice could be heard clearly throughout the Sistine Chapel.

...Winston Bell, one of the few colored men practicing law in Baltimore, has been serving as a waiter during the summer at a hotel near Boston. He has been practicing law but a short time, and finding it hard work to get clients is compelled to work during the summer to help pay his expenses. He is a graduate of the Harvard Law School.

...John P. Smith, the veteran theatrical manager, is critically ill at a hospital in New York. Mr. Smith is probably best known for his connection with "Uncle Tom's Cabin," a play which he produced in all parts of the country. He also managed Artemus Ward's last lecture tour, and directed Clara Morris's earlier starring tours.

A GREAT SURPRISE IS IN STORE

For those who will go today and get a package of GRAIN-O. It takes the place of coffee at about ¼ the cost. It is a food drink, full of health, and can be given to the children as well as the adult with great benefit. It is made of pure grains and looks and tastes like the finest grades of Mocha or Java coffee. It satisfies everyone. A cup of Grain-O is better for the system than a form, because its benefit is permanent. What coffee breaks down Grain-O builds up. Ask your grocer for Grain-O. 15c. and 25c.

THE TRYST.

Here is the wonder of moonlight planted
Adown the enchanted woodways, here
The strange and jubilant song of sedges
On wind-swept ridges of stream and mere;
And ripe roses swing in the burgeoned hedges,
Leaning their lips anear for pledges
Of a tryst new found and a life made dear.

Of a tryst new found! In our days asunder,
The gray skies under, ah, sweet, my own,
If I had but known in my far sojourning
Of this returning, the hope alone
Had won my heart from its hapless yearning:
Alike my fears and my doubtings spurning,
I had been content—if I had but known!

For, wheresoever my feet went roaming
At every gloaming my heart would fly,
Birdeward drawn and hither winging,
Persistent clinging to trysts gone by,
Seeking the hours of the night-bird's singing,
Hours of the stars in the far skies swinging,
Of dusk and the roses and you and I!

Yet, if in days of dread disaster,
When Love was master, his gifts were slow,
Shall I now complain that he meant to cheat me,
When roses greet me with scents I know,
When liquid notes of the thrush entreat me,
And when through the dusk you come to meet me,
Even as then, in the long ago?

At our tryst again, under mystic, far light
Of steadfast starlight and rising moon,
I have come to the end of doubt, and grieving,
And dreams deceiving—for soon, for soon,
Would come peace past all believing,
And all my sorrowful quest retrieving,
I shall touch the lips of my rose of June!

—[Harper's Bazar.

FANCIES.

"Never late than never."
She said as she turned the lock—
He'd just proposed and said good-night,
And it was 12 o'clock!

—[Chicago Daily News.

Hicks—Kolter was ahead at the inquest, but upon cross-examination Locke was declared elected.

Wicks—You mean upon the recount, I suppose?

Hicks—Mean just what I said—cross examination. An examination of the crossed, you know.

"I'm afraid," said Mr. Meekton, "that I must plead guilty to being a base ball crank."

"I don't think so," replied his wife. "After accompanying you to one game I am prepared to say that you are not a crank on such matters. You are a raving maniac."—[Washington Star.

Visitor—You don't mean to tell me that you have lived in this out-of-the-way place for fifteen years?

Citizen—I have for a certainty.

Visitor—I'm surprised. I can't see what you find here to keep you busy.

Citizen—Niche" can I. That's why I like it.—[Richmond Dispatch.

He—I think I shall have to preach a bicycle sermon tomorrow, advising all my parishioners to ride a wheel.

She—Why, Joseph, it was only three weeks ago that you denounced the wheel most thoroughly.

He—Yes, but, remember, my dear, that was while I was learning to ride.—[Harper's Bazar.

Mr. Mann—Did you see that woman Jones passed over?

Mrs. Mann—You mean the woman in the camel's-hair gown and beaver jacket; the one who had on bronze shoes, a hat trimmed with fuchsias and heliotrope, with pink ribbons and a chiffon veil? No, I didn't notice her in particular. What was you going to say about her?—[Boston Transcript.

"You will have trouble very soon," said the fortune-teller, attentively studying the lines in the palm, "with a tall, dark man. Be on your guard."

Mark how closely the fulfillment followed on the heels of the prophecy. Within three hours thereafter the fair caller's butler, a gentleman of Abyssinian extraction, struck her for higher wages.—[Chicago Tribune.

TO THE BOSTON FOOD FAIR.

The centre of attraction for the present month in Boston is the "Food Fair," in Mechanics' Hall. This fair has made a decided hit under its present management and through the manifold attractions and features that distinguish it, and is winning commendation from all sorts of people. To enable all to visit this educational exhibition the New York, New Haven & Hartford railroad will run a special excursion train from Newport and all stations to Tiverton inclusive on Wednesday next, for which round-trip tickets will be sold at reduced rates, each including a coupon for admission to the fair.

SEALED

As a good thing ought to be—in bottles. And sealed medicinally pure—and ripe with age—and mellow. That name on label over the cork. It's there because it protects your interests as well as ours.

INTRODUCED 1855.

PROBATE NOTICES.

Probate notices are published in the Daily News as ordered by the Courts of Probate in the several towns in Newport County. Administrators, executors and guardians are notified to ask the courts to order the insertion of their notices in the Newport Daily News. The cost is no more as in any other paper in the county.

NEWPORT PROBATE NOTICES.

At the Court of Probate, of the City of Newport, on Rhode Island, holden on Monday, the 20th day of September A. D. 1897, at 10 o'clock A. M.

WILLIAM A. Copeland, Administrator on the estate of

ANNIE R. COGGESHALL,

late of Newport, deceased, presents his first and final account of administration on said estate and prays that the same may be examined, allowed and recorded, and that an order of distribution of the balance that may be found due from him as such Administrator among those who are legally entitled thereto.

It is ordered that the consideration of said account be referred to Monday, the 18th day of October inst., at 10 o'clock A. M., at the Probate Office in the City Hall, Newport, and that notice thereof be given to all persons interested, by advertisement in the Newport Daily News once a week at least, for fourteen days.

WM. H. HAMMETT, Probate Clerk.

At the Probate Court, of the City of Newport, on Rhode Island, holden on Monday, the 20th day of September A. D. 1897, at 10 o'clock A. M.

On the petition, in writing, of Edward S. Peckham of said Newport praying that an instrument in writing presented therewith, purporting to be the last will and testament of

ESTHER P. JOHNSON,

late of New Haven, Connecticut, deceased, which may operate upon certain real estate in said Newport may be proved, approved, allowed and recorded, and that letters testamentary on the estate in Rhode Island of said deceased may be granted to him, the Executor named therein.

It is ordered that the consideration of said petition be referred to Monday, the 18th day of October inst., at 10 o'clock A. M., at the Probate Office in the City Hall, Newport, and that notice thereof be given to all persons interested, by advertisement in the Newport Daily News once a week at least, for fourteen days.

WM. H. HAMMETT, Probate Clerk.

GUARDIAN'S NOTICE.

The Newport Journal contains the best matter in the Daily News each week, and will be sent anywhere in the United States, postage paid, for $2 a year in advance. Requests for change of address should give old address as well as the new.

ADVERTISING RATES.

Advertisements, without special position, $1 a square for the first insertion and 25 cents for each continuance. Ten lines, or less, nonpariel type (or five-sixths of an inch) make a square. Advertisements of five lines or less are taken at about one-half these rates. A discount is allowed on all advertisements ordered in the Daily for more than one week, or when both papers are used.

Yearly or Term Advertisers are limited to their immediate business, are guaranteed but five insertions in a week, and are allowed twenty-five changes a year. Electrotypes will be used without extra charge if solid metal; "wood backs" cannot be used with safety to the press.

Advertisers using both the daily and weekly papers receive a discount on the combined rates and gain the advantage of distinct classes of readers, no person reading both the daily and weekly. The Journal goes among people who read no other local paper.

PRINTING.

The News has six steam presses and has a large and well-appointed job printing office.

Newport Daily News

FRIDAY, OCTOBER 15, 1897.

ITEMS OF LOCAL INTEREST ARE SOLICITED, AND WILL BE USED IN THE DAILY NEWS IF THEIR AUTHENTICITY IS KNOWN. COMMUNICATIONS OF ANY KIND SENT TO THIS PAPER MUST BE ACCOMPANIED IN ALL CASES WITH NAME OF SENDER OR THEY CANNOT BE PUBLISHED UNDER ANY CIRCUMSTANCES.

HENRY GEORGE.

Mr. Henry George, who is certainly one of the leading candidates in the exciting contest going on in Greater New York, lays down a peculiar platform, according to which his administration, if elected, is to be conducted. Among other things the statement is distinctly made that he will enforce the laws as he himself will interpret them. It is scarcely possible that he means by this to ignore the decisions and opinions of the courts and of the officials who are designated to make the interpretation for him. The mayoralty is an executive office, not a judicial one, and for a candidate to say that he will enforce the laws so far as the letter is concerned only, and according to his personal version of them even to that extent, is tantamount to saying that if the laws do not happen to agree with his notions he will practically render them void, instead of appealing to the legislature to revoke or amend them.

It is well known that Mr. George entertains peculiar opinions concerning economic questions, and holds to theories that have never as yet been put to the test. Take, for instance, the question of excise laws, so far as the liquor traffic is concerned. He announces his belief that there should be no regulation of the traffic, no restrictions as to the persons engaged in the business or the places where it is carried on. In other words, he would open the door to everyone alike, and, as he is opposed to restrictions on human liberty, this rule would largely apply, according to his statement, to vices and crimes of even a more general character. It is certain that the letter in which he announces his policy is a curiosity in economics, and foreshadows, should he come to the front, a social, moral and intellectual revolution.

And yet these very absurdities possess many attractions to the minds of some people, and among certain classes will add greatly to his strength. There are a host of liquor dealers in Greater New York, who would rejoice greatly if they could escape the restrictions now imposed upon them. To such, and to many of their patrons, this free rum plank is peculiarly fascinating. But how will it be with respectable and sober-minded citizens who are thus exposed to having low dives set up in their neighborhood, without their permission, and evidently greatly to their discomfort and disadvantage? Are they ready to accept a candidate standing upon a platform favorable to the largest liberty in this direction of evil? Is it desired or possible that the schools, churches, orphan asylums and hospitals, shall have no protection in this point? We think not. And if it be true that the candidate is practically backed both by Seth Low and Henry George it would seem that every good wisher to common prosperity and a continuance thereof of high grade should give his support to the man who abhors the vices of this character. And Mr. George is the devotee of other absurdities and the supporter of other schemes that, if carried into effect, would thoroughly revolutionize society at large. That there are people who desire all this, and who believe that these changes can be brought about without harm to the general public, is not to be disputed. On this Mr. George has a claim, but plainly on no others.

RAILROAD ACCIDENTS.

In the sixteenth report of the interstate commerce commission for the year ending June 30, 1897, it is shown that accidents on the railroads of the United States included nineteen hundred employes killed and about thirty thousand who had been injured. This was an increase of fifty in the number of fatal accidents, and slightly more than four thousand in the number of persons injured.

This seems an appalling and somewhat alarming fatality, which perhaps may be better seen in the statement that for every 411 men employed on the railroads one was killed during the year, and for every 28 men employed one had met with an accident more or less serious. In descending still further as to details, it is made to appear that one trainman was killed out of each 152 employed, and that one was injured out of every 19 men in that particular service.

But in the case of passengers the casualties appear to have been very small. The passengers numbered 2,827,474, and of these the number carried for one injured was 178,122. The total number of fatal accidents among this class was 181, and the number of persons injured did not quite reach 3,000. These figures would lead to the conclusion that, while the railroad service is especially dangerous to employes, it is fully as safe to be on board a passenger train as to remain in one's home, and about one's usual business.

A REASONABLE CONCLUSION.

The relations between an agent and his employer, so far as legal responsibilities are involved, have been frequently discussed, and in most cases are well understood. But cases occasionally arise concerning which doubts exist, and which it is well to have authoritatively settled. For instance, the Journal of Commerce holds that a general salesman employed by a firm to sell its goods has implied authority to fix the price. If this were not so, it says, a purchaser could not safely deal with any one except the actual owner of the goods. If the salesman has been instructed not to sell below a certain price, those instructions are binding as between himself and his employer, but they do not bind a purchaser who has no knowledge of them.

The Journal goes on to argue that there is one apparent exception to the general rule. If the price named by the agent is so unusual or so unreasonably low as to put the prudent buyer upon his guard, then the principal will not be bound. The ground upon which a buyer is enabled to hold a principal to the contract of his agent is that the buyer deals with the agent in good faith, supposing him to have the authority of his principal to fix the price as he has fixed it. But if the price is so far below the market that a prudent man would be led to doubt the authority of the agent to fix such a price, then the Journal holds, the principal is not bound.

The board of aldermen of New York recently amended the city ordinance in relation to carrying lights at night. The ordinance as it now stands provides that bicycles, cabs and all vehicles carrying persons must have lights, but that trucks and other vehicles used only for transporting merchandise need not. The cyclists of New York are up in arms over the change, as they claim the exemption of trucks is a dangerous thing in city streets or on country roads, and is likely to lead to serious collisions. An effort is being made to have the ordinance restored to its original form, and compel all vehicles, of whatever description, to carry lights at night. In France, where much attention is paid to the public safety, it is said that even wheelbarrows are required to be lighted.

The New York Commercial Advertiser asserts that the Citizens' Union was the only obstacle to a combination that could easily have defeated the Tammany machine. That is putting the cart before the horse. The Citizens' Union named a good candidate, and it was just as easy for Mr. Platt to have united upon Mr. Low as it would have been to have had Mr. Low withdrawn that the Platt machine might make a nomination of its own, and leave the Citizens' Union candidate to get out of the way.

Word comes that a colored woman in Arkansas has had the audacity to prepare herself as a physician, and announce her readiness for practice. Of course there is some excitement over such a bold act, and some of the people are stoutly objecting. But to the credit of the white members of the profession it should be said that on their part no objections are raised on account of the candidate's color or sex.

"A Rhode Island farm has been foreclosed on a debt of $230, and, although there was a habitable house and good barn on it, it only fetched $13," says the Boston Globe. When this story first started the rounds of the newspapers, the farm in question was said to be in Connecticut. We suspect that it is in neither state.

The Fall River Herald says that "present indications point to a local municipal government next year several shades worse than this year's aggregation." We supposed such a thing was impossible; but there is no knowing what can be done in Fall River. It is a fast-going city.

The proposition is now made to divide Alaska and set off the southern half as a territory to be named Lincoln, in honor of the martyred President. We should say that it was a good one, for the immigration to that section is so great that some authorized government should be established at an early day.

Mr. Bryan's latest joke on himself is that, not knowing that Mr. Hanna had planned a wheat famine in India, he planted his five-acre farm in Nebraska with corn. "It is just my luck," he says. "I am like the man who, after a series of misfortunes, said if it rained soup he wouldn't have any spoon."

The Hartford Courant, Senator Hawley's paper, in spite of the entreaties of Platt and the execrations of the New York Sun, still supports Seth Low for mayor of Greater New York. And so do most of the more respectable and responsible papers of the entire country.

At the last accounts Senator Morgan was delivering the same old speech to the Hawaiians that took him three days to get off in the United States Senate. If it proves to be more effective in that country than it did in this the chances of annexation will not be greatly improved.

In talking about New York city politics it is well to remember that the issue there is not between the two great parties so much as over the question of partisan and non-partisan municipal government. All the parties are split into smithereens and all the machines are badly broken.

President McKinley keeps on appointing negro postmasters in the South, notwithstanding the disposition on the part of the poor whites to shoot them at sight. The colored people want postoffices, and appear to be willing to take the chances.

A company of pretty Georgia girls, which has been drilling in one of the schools, has made application to be mustered in as a detachment of the National Guard. If accepted, the company will surely be able to shine on dress parade.

Tomorrow is the last day for registering in Greater New York, and it is expected that there will be a rush to get names on the list. As yet it is not very full.

The Republican party of Texas is very small, but has proceeded to split itself in the middle. By the way, this is quite the fashion of the times.

One million official ballots will be printed for the coming city election in Greater New York, at a cost, it is stated, of $90,000.

THE NATION'S DANGER.

If there were two parties in this country, closely balanced, both respected and respectable, who had alike what were recognized as warrantable ideas on the currency, the tariff, the sphere of government and the division of power in its different departments, there would be in our politics a contest in which principles would take the precedence of men. Perhaps this was most of all true in the period preceding the late war, when the subject of human rights was at issue, and a decision was impending as to the spread of human slavery. This has all gone by now. The tariff policy has been established for the present; the currency is in no danger of being made worse; slavery is something far back in the past; the province of government is not in practical issue. The public prosperity is not threatened on any of these points. Yet there is public enmity of a serious character. It is found in those who would debauch all parties, who would attack not only statesmanship, but purity in the government itself, who would pervert its operations, and corrupt it into an instrument for their own selfish purposes.

The race of statesmen is not extinct in either party, but no man can have carefully studied the history of our more recent years and fail to see that a new set of men have arisen who are without claim to anything like statesmanship, but whose recognized power in public life is fully equal to, if it does not exceed, that of statesmen. The great state of Pennsylvania has been long under the domination of such men. The greater state of New York has bowed down to them in both parties. From the days of Roscoe Conkling, who prostituted statesmanlike talents to ignoble efforts to engage in politics after the manner of this class of men, down to that of David B. Hill, who followed much on the same track, to the lower depth attained by subserviency to Thomas C. Platt, and the yet lower, if that were possible, of Richard Croker, the politics of New York have been degenerating.

Take another great state—that of Ohio. The time is brief since John Sherman, who at least had been a statesman, was induced to yield his seat in the Senate to Mark Hanna, who had demonstrated no claim to it but the capacity to intrigue to carry a Presidential nomination and to raise and distribute money to compass a Presidential election. The President of the United States, whom he had served in this way, was understood to exert his personal influence to bring this about, and not only that, but to declare his purpose to aid by the bestowment of office the men who had ostracized statesmanship that their personal power might be established in New York and Pennsylvania.

Need we offer any proof further that these men are public enemies? If the displacement of statesmen that they themselves might have the control in great states after their own notorious methods does not prove it, nothing could. The present danger to this country is in the debauching of its politics—in the placing of its Quays, its Platts, its Gormans and its Hannas in the seats from which its Shermans and its Palmers are already ousted, and where its Hoars, its Morrills and its Grays are to lag superfluous if this rapidly advancing influence is to go on. Our history of recent years affords a series of object lessons to what our politics is tending. The most impressive one of them all is now enacting in New York, where an attempt is being made to prevent the citizens from having pure government by one of this new class of public men who are supersiding statesmanship in our country. He makes a virtual demand that the city be delivered up to him to be used for his personal purposes, and he threatens to carry it over to corruption in another quarter if he be not allowed to make it the theatre of his own corruption.

This lowering the tone of statesmanship, this attempt to carry parties over to systematized corruption, is the most prominent feature in our present politics. Those engaged in it are public enemies. It is far more important that their influence for evil be met and nullified than it is that one or another party shall obtain a few thousand more or less votes. It is the duty of all patriotic men to oppose them, and it appeals to them without regard to party. It is more incumbent upon the Republicans than the Democrats, if anything, because in the Republican party these men are making the greatest advance and becoming the most formidable at the present time.—Boston Herald.

THE PROFESSOR HAD TO WED AT ONCE.

Curious verification is said to have been given not long ago to the tradition that no man is allowed to become a member of the Vassar faculty unless he be married. If a man make application for membership, the rule is to first inquire if he be married.

The proverbial exception to this rule occurred in the case of a young man who sought to fill the Vassar chair of history not long ago, and was so acceptable in every way that his examiners forgot to inquire into the most important thing of all—this state of double or single blessedness. Not until the day for opening the college was at hand did any one of them recall how shockingly they had left undone those things which they ought to have done. The young man, by that time arrived, had to confess that he was a bachelor. Well, there was nothing for it but the one thing, so the faculty hemmed and hawed a bit, and finally got it out that the young man must get married.

"We'll give you just two weeks," they said; "otherwise you'll have to resign your place. Surely, you know of some girl you can get to marry you within two weeks."

It was now the turn of the poor young man to hem and haw, but he saw that there was no alternative, his whole professional future depended upon it, so he permitted himself to be hustled off the campus before any of the susceptible students caught sight of him, promising to return within a fortnight married. He was as good as his word, though he had a pretty hard time fulfilling the contract to the letter.—[Philadelphia Press.

At a Reduced Price!

Until October 15, handsome Country Residence (the house, stable, trees, etc.) containing about 20 acres of land or somewhat less, will be offered at a PRICE SO REASONABLE that a sale should result; unless sold, it will be withdrawn and occupied by the owner.

THE WEATHER.

WASHINGTON, Oct. 15, 8 A. M.—For New England—Fair tonight and Saturday; slightly warmer tonight; southwesterly winds.

FOR BOSTON AND VICINITY.

BOSTON, Oct. 15, 8 A. M.—For Boston and vicinity—Fair tonight and Saturday; warmer Saturday morning; southwesterly winds.

WEATHER CONDITIONS.

The depression which occupied the upper valleys yesterday morning has nearly disappeared, and the weather is generally fair, excepting some cloudiness in Northern sections and here and there a light shower. The warm area has spread eastward to the lower Lake regions, where the temperature registers in the seventies. It is rising steadily in the East. The cool area covers the Western states, with freezing temperatures in the Dakotas and Montana. New England skies are lightly clouded, but there is little indication of storm.

FINANCIAL.

NEW YORK, Oct. 15, Wall Street—The stock market opened irregular, with Sugar at 139¾. Tobacco at 81½, Chicago Gas at 94¾, Burlington at 92½, Rock Island at 85⅞, St. Paul at 92½, Louisville at 66⅞, Southern preferred at 30¼, Wheeling & Lake Erie at 2½, Manhattan at 99½, and Missouri Pacific at 26¾.

10—The changes in prices of the railroad stocks was very narrow at the opening of the stock market, but losses predominated. The specialties and industrial stocks were the more active and showed the widest changes. Sugar opened off ⅝, and extended the loss to 1⅜. Tobacco and Manhattan were also off ½. Chicago Gas opened up ⅝, but quickly lost the improvement on very heavy dealings. Two blocks of 1,000 and 2,400 shares were sold at the opening quotation.

11—Prices generally hardened a fraction after the opening, but the improvement was soon stemmed by a concerted drive against the industrials, the extreme weakness of which soon spread to the balance of the list. Sugar and Chicago Gas were the especial points of the attack, and lost 2⅝ and 2¾ respectively. The other specialties suffered to the extent of 1 to 1⅜. The railway list offered some resistance, but eventually yielded sharply, the Southwesterns leading the decline. The market rallied slightly towards the expiration of the hour.

NOON—Money on call, nominally at 2½ @ 3 per cent; prime mercantile paper, 4½ @ 5; sterling exchange, steady, with actual business in bankers' bills at $4.85½ and $4.81 @ 32; posted rates, $4.82 @ 83; commercial bills, $4.81; silver certificates, 58; bar silver, 58¾; Mexican dollars, 44½; government bonds, firm; 4s reg., 125¾; 4s comp., 127. The rally was short-lived. Sugar was again raided down to 137, a fall of 3¾. Chicago Gas fell 2¾, and Tobacco 3 points, ex. div. of 2 per cent. Other declines exceeded a point. Many railroad stocks fell a point or over. Sugar and Chicago Gas rallied over a point, and the general list was lifted a small fraction in sympathy, but the market became very dull on the rise.

ITS NINETEENTH.

Semi-Annual Report of the Saving and Building Association.

At the meeting of the Newport Co-operative Association for Saving and Building this evening the secretary will present the nineteenth semi-annual report of the finances of the association, which shows the steadily increasing favor in which it is held in the community and speaks well for its management. The account of assets and liabilities is as follows:

ASSETS.

Loans on real estate,	$118,950.00
Loans on shares,	11,967.00
Premium of expired account,	91.11
Cash on hand,	57.16
	$101,075.00

LIABILITIES.

Stock account,	$150,572.00
Forfeited share account,	134.11
Guaranty fund,	237.40
Undivided profits,	131.07
	$101,075.00

The cash account is as follows:

RECEIPTS.

Balance from last statement,	$2,011.13
Receipts from dues, interest, fines and fees,	15,742.91
Loans repaid, real estate,	15,705.00
Loans repaid, shares,	2,365.00
Bills payable,	1,000.00
	$19,027.05

DISBURSEMENTS.

Loans, on real estate,	$12,530.00
Loans, on shares,	1,312.00
Retired shares,	1,018.52
Withdrawal of stock,	2,212.05
Expense,	303.81
Interest,	24.11
Bills payable,	1,000.00
Cash on hand,	57.16
	$19,027.05

The association was started in April, 1888, and there are now nineteen series of shares, with a total of 3,300 shares. In the first series $111 has been paid on each of 100 shares, and the present value of each is $166.95, with a withdrawal value of $146.21. In the second series $108 has been paid on each of 55 shares, the present value being $145.98, and the withdrawal value $136.48. In the third series there are 36 shares, on each of which $102 has been paid, the present value being $135.51 and the withdrawal value, $127.13. In the fourth series there are 26 shares, on each of which $96 has been paid, the present value being $125.30 and the withdrawal value $117.07. In the fifth series, including 62 shares, the amount paid on each is $90, of which the present value is $115.18 and the withdrawal value $109.11. In the sixth series, 13 shares, $81 has been paid on each, the present value of which is $105.91 and the withdrawal value $100.46.

In the seventh series there are 134 shares, on each of which $78 has been paid, the present value being $96.70 and the withdrawal value $92.03. In the eighth there are 127 shares, $72 having been paid on each, and the present value is $87.75 and the withdrawal value $83.61. The ninth series has 107 shares, on each of which $66 has been paid, the present value being $79.10 and the withdrawal value $75.33. In the tenth there are 58 shares, $60 having been paid on each, and the present value is $70.71 and the withdrawal value $68.81. The eleventh has 250 shares, each representing $51 paid, the present value being $62.58 and the withdrawal value $59.44. The twelfth has 105 shares, each representing $48 paid, the present value being $51.71 and the withdrawal value $53.03.

In the thirteenth series there remain 233 shares, representing $12 paid on each, the present value being $47.08 and the withdrawal value $15.81. In the fourteenth there are 219 shares, on each of which $36 has been paid, representing a present value of $39.69 and a withdrawal value of $34.74. The fifteenth series represents 251 shares of $30 each, of which the present value is $32.81 and the withdrawal value $31.90. The sixteenth series has 320 shares, on each of which $24 has been paid, the present value being $25.61 and the withdrawal value $25.21. In the seventeenth series there are 421 shares, of an initial value of $18 each, the present value being $18.50 and the withdrawal value $18.08. In the eighteenth, started a year ago, there are 261 shares, representing $12 each, the present value being $12.40 and the withdrawal value $12.30. The last series, which has run only six months, has 247 shares of $6 each, the present value being $6.10, and the withdrawal value $6.07 each.

The assets during the past six months have increased from $150,559.59 to $161,065.60, a gain of $10,515.01. The usual dividend at the rate of six and a half per cent has been earned on the several shares.

STEAMER SQUANTUM DISABLED.

Last night steamer Squantum, running on the Wickford line, broke a pipe connecting the two boilers, and today arrived from Wickford an hour and a half late, under one boiler. Tug Aquidneck was secured to carry the mails to Wickford and left at 9:45, arriving back at 1:05 with the mails, papers, passengers and perishable freight, after a rather wet voyage, due to the wind and contrary tide. The Squantum was ready to go at 1:20, when another defect was discovered and the Aquidneck was again called upon and took the mails and about twenty-five passengers to Wickford. The Squantum will probably be ready for service this afternoon.

NEWPORT CONLAVE'S VISIT TO NEW BEDFORD.

Gosnold Conclave, No. 106, Knights of Sherwood Forest, of this city, entertained Newport Conclave, No. 39, Tuesday. After the parade dinner was served at the Manhattan House and the visitors were afterwards driven in barges to points of interest. In the evening a banquet was served in Pacific Lodge hall. Thomas J. Clynes was toastmaster of the evening and there were remarks by Supreme Commander Daniel J. McGowan, Supreme Adjutant J. E. Sullivan, Louis Schantcler and others from Newport. Professor F. A. Fredericks gave several piano and vocal selections, and there were recitations and speeches by New Bedford members of the order. A poem was read by Edgar Wallen, adjutant of Gosnold Conclave.--[New Bedford Standard.

FUNERAL OF MRS. BLIGHT.

The funeral of the late Mrs Atherton Blight took place from Trinity Church this morning, Rev. Dr. H. E. Bowers, assisted by Rev. E. B. Porter, conducting the services. The remains were enclosed in an oak casket. An unusually large number of flowers were sent, and were taken to the church. The attendance was large, many persons coming from Boston and Philadelphia. Among those present were Mr. and Mrs. Lawrence Curtis, Mr. and Mrs. Sidney Webster, Mr. and Mrs. H. F. Webster, Mr. and Mrs. Frederick Sheldon, Mr. H. A. C. Taylor, Mrs. R. T. Wilson, Mrs. G. H. Warren, Mrs. A. L. Sands, Mr. and Mrs. L. Townsend Burden, Mr. and Mrs. d'Hauteville, Mr. Edmund Tweedy, Mr. and Mrs. C. W. Yulee, Mrs. Burke-Roche, Mr. W. R. Travers, Mr. and Mrs. W. W. Sherman, Mrs. J. Ellis Hoffman, Mr. and Mrs. John Nicholas Brown, Mr. and Mrs. Harold Brown, Miss LaFarge, Colonel and Mrs. E. M. Neill, Mrs. Perkins, Mr. and Mrs. E. R. Wharton, Mr. and Mrs. J. T. Spencer, Mr. and Mrs. A. C. Duncs, Mrs. Roberts Gerdel and Mr. T. F. Cushing.

The interment was in the Island Cemetery.

PROPOSED IMPROVEMENTS AT ST. MARY'S CEMETERY.

Rev. Dr. Grace of St. Mary's parish is preparing to make improvements to the older part of St. Mary's cemetery on Vicksburg place. The fences about this section of the grounds are becoming somewhat the worse for age, and it is proposed to replace them by something more enduring and at the same time more ornamental, and to make other changes in the grounds, which have been gradually improved for several years past by clearing away shrubbery. The new section, on Warner street, has a substantial stone wall, and has always been kept in excellent condition; and it is desired to have the entire ground look as well.

IN THE INTEREST OF A LIBERIA INDUSTRIAL SCHOOL.

Last evening there was a good-sized gathering at the Shiloh Baptist Church to listen to a lecture and witness a stereopticon exhibition by Mr. R. L. Stewart of Liberia. Mr. Stewart has at his home in Africa an industrial school, in which he is educating twenty-five boys and girls, each one of whom he purchased in the interior of that country and adopted. His lecture and panoramic display illustrates the work done in this school. Accompanying him is a boy, Charlie Stewart, who was bought by his foster-parent for ten kegs of powder. He is now about eleven or twelve years old, and has been under the influences of Christian training not quite two years, though in appearance he is not different from other boys of his age. In connection with last evening's lecture he sang and spoke in English, and also in his native tongue. Mr. Stewart is anxious to secure in this country two or three colored teachers for his school, and also to obtain contributions for the purchase of tools, furnishings and supplies. He will continue his lecture at the Shiloh Church this evening.

FUND FOR YELLOW FEVER SUFFERERS VERY SMALL.

Some time since Mayor Boyle received an appeal from the mayor of Biloxi, Miss., asking for pecuniary assistance for the sufferers from the yellow fever scare, which, as readers of the newspapers know, practically stops business and affects everybody, whether they take the fever or escape. Mayor Boyle responded, saying that he would call the attention of the charitably disposed to the appeal, and would promptly forward such funds as were contributed. He has since received $28, of which $20 came from one person. As no contributions have come in during the past few days, Mayor Boyle is in doubt as to whether this is the extent of Newport's charity toward the yellow fever sufferers. If it is, he proposes to return the money to the contributors, as he thinks $28 is too little to send South as Newport's total contribution. If, therefore, any persons feel inclined to increase this amount and have Newport send a fair-sized sum to help the sufferers, they should show their feeling promptly by forwarding their contributions to the mayor, who will publicly acknowledge them.

MRS ROSS'S CLAIM IN NEW YORK.

Eugenia A. Webster Ross obtained permission from Justice Smyth of the supreme court in New York Thursday to withdraw her amended answer in the case brought by William Dehon King and other heirs of the late William H. King, and to stand on her original answer, she to pay $50 costs. The action was brought to settle her claims to title in many parcels of real estate in New York. In her answer she made a counter claim to the property as a niece of the millionaire, but when she was ordered to serve a bill of particulars of her relationship she withdrew her answer and served the amended answer, which makes no counter claim, but simply denies that the plaintiffs are the only relatives.

CONTENTS OF MRS. HACKMEISTER'S TRUNKS.

The trunks of Mrs. Hackmeister were brought from New York this morning and are now at the office of Detective Richards, where they were examined by Mrs. Derby, as the representative of Mr. J. N. A. Griswold; Mrs. C. C. Moore and Colonel G. R. Fearing, by whom she had been employed. The trunks were filled with china, crockery, Dresden ware, bric-a-brac and an assortment of small articles. There were towels, laces, dress goods, collars, cuffs, books, pictures, many small paintings, about three dozen silver spoons of various sizes, knives and forks, etc.

Mrs. Derby identified some of the articles and took them home, refusing, as did Mr. Fearing, to take laces, linens and such articles as were of no particular value. Mr. Fearing identified three decorated jars, a brass lamp and a snuff box. Mrs. Derby took five cups and saucers, two picture frames, five sconces, sugar tongs, five silver spoons, a carving knife and fork, a book, towels, several gilt cuspers and some napkins. The value of the other articles left is about $200, but they will be turned over to the woman in case no owners appear to claim them. The persons who have identified their goods are not anxious that the woman shall be further punished and she will be given her freedom at the expiration of her sentence.

JAMESTOWN.

(Regular correspondence of the News.)

Mr. and Mrs. Henry Smith of Providence are visiting here.

The procession of fishermen from Newport continues, and wagon loads of men come each day to go to the rocks. Fish were never more plentiful than now. Mr. John Caswell and Mr. Riley of New York captured one hundred and one black fish at the Dumplings Wednesday.

Of one hundred tax payers who were assessed in Jamestown in 1856 but seventeen are alive. In that year the real estate valuation was $258,240, and the personal estate $120,600. The whole amount of tax was $1,654.63, and the amount appropriated for roads, $410.00. The total number of tax payers was one hundred, comparison of the tax book of that year with the book of 1897 is interesting.

TO VISIT THE NEWPORT.

Children of the Schools to Be Given Every Opportunity.

Secretary Aldrich of the Newport silver service committee, after the meeting of the committee last evening wrote to Superintendent Baker of the public schools, saying that the committee thought the school children might wish to inspect the gunboat, and that to accommodate them Commander Tilley had agreed to bring the vessel to the Old Colony dock. It was suggested that Tuesday be the date of the visit, and a schedule was presented dividing the schools into delegations nearly equal in number, each of which is to remain on board half an hour, beginning at 1 o'clock in the afternoon and closing at 5. It was also suggested that the kindergarten and younger children, unless accompanied by older brothers or sisters, should not make the visit, and that teachers should accompany their classes to help preserve discipline. Today Mr. Abbott called on Superintendent Baker, and was informed that he would do all he could to assist the plan of the committee.

At the last meeting of the school committee it was voted to give the scholars a half-holiday in connection with the visit of the Newport, if the plan met the approval of Chairman Barker and Superintendent Baker. If, therefore, Dr. Barker approves the plan suggested, Mr. Baker will on Monday notify the several teachers of the arrangement. As the school committee merely gives the half-holiday for the children, and assumes no responsibility for the visit, the teachers may go with their schools or not, as they please. The question whether children shall visit the ship will depend entirely on the judgment of parents. As the ship will be at the wharf, however, it is expected that nearly all who are large enough to be trusted on the wharf will be allowed to go.

Mr. Abbott saw Father Deady of St. Joseph's parochial school, which was assigned the period from 9:30 to 10:30 in the morning and Father Deady, in behalf of the children, accepted the invitation to visit the ship. Mr. Abbott also visited St. Mary's rectory, but as Dr. Grace was absent at the time there will be no report on this school until after Mr. Abbott sees Dr. Grace this evening. St. Mary's parochial school was assigned the period from 10:30 to 11:20.

Mayor Boyle has promised to send policemen to the wharf to keep the children out of danger during the hours assigned for their visits.

LOCAL BRIEFS.

--Assistant Paymaster P. G. Inman has been ordered to the Newport.

—Rev. J. W. Hill of Boston will preach at the Union Congregational Church Sunday.

—Mr. and Mrs. Robert Haire have just returned from a two weeks' visit to Ramsey, N. J.

—Mr. Samuel Bateman, brother of the late Benjamin Bateman, and well known here, died at Tiverton Four Corners yesterday.

—Mrs. J. P. Stone entertained at dinner last night, Mrs. C. M. Oelrichs gave a children's party and Mrs. E. L. Cunningham held a reception.

—The police ambulance was called this afternoon to take a woman from 12 Perry Mill wharf to the hospital. She had fallen down stairs and broken her leg or hip.

—The entertainment and sale for the benefit of the Second Baptist Church attracted a goodly number last evening to the residence of Mr. and Mrs. John R. Caswell on Bull street, where a pleasant and profitable evening was passed.

—At the funeral of the late James Logan, yesterday afternoon, Rev. Dr. T. C. McClelland of the United Congregational Church officiated. The bearers were James Doherty, John P. Scott, J. G. Spingler, ex-mayor Franklin, G. A. Wilcox and S. T. Goddard.

FROM SUPERINTENDENT KOHLER.

To the Editor of the News:

Desiring to aid in making the presentation of the silver service to gunboat Newport an occasion memorable to the school children of the city, who worked so energetically in raising their share of the fund for its purchase, and in order that they might see the vessel to the very best advantage, I offer to give the scholars and teachers, for the single fare of five cents each, a round trip to and from Jamestown, affording a six mile sail with the very best view of the Newport and the many points of interest in beautiful Narragansett bay. The only conditions I made were that the teachers should accompany their respective schools, to maintain proper discipline, and that not more than four or five hundred should be on board on any trip, I agreeing to make as many trips as would be necessary to accommodate all the scholars wishing to go.

Also, in view of the fact that neither the school authorities nor the testimonial committee had the funds to pay the small sum needed for this purpose, had the offer been accepted I would then, as now, be willing to subscribe $5 personally; and surely there are many citizens who would consider it a privilege to give toward the same object.

JOHN P. KOHLER.

SPAIN'S NEW CABINET.

Spain's new cabinet has been made up by Senor Sagasta. It is Liberal, and yet it is Spanish Sagasta himself has probably no more idea of accepting the medicine of this country than his predecessor, Canovas, had, and events are not drifting in that direction. Although Weyler insists on retaining command in Cuba, it may be assumed to be probable that the outrages and murders, of which we have heard so much complaint, will cease there. And, in view of that, the jingoes who have been insisting on the intervention of this country because of the cruelties practiced by the Spaniards should wait and see what the new government will do. It is clear that the queen regent is opposed to cruelties, and it is fair to presume that Sagasta agrees with her, since she forced out Azcarraga and invited Sagasta to be his successor. It is said that the President is troubled by the approaching meeting between himself and the Congressional jingoes. It is to be hoped that he will not pander to his apprehension, but that he will permit the jingoes to go their own way. If they are eager to cover themselves with infamy, and to plunge the country into a wicked war, they will insist on intervention by the United States, even if the Spanish government has actually removed every cause for interference. We had hoped that events were drifting toward pacification, because we believed that Spain would find it impossible to put down all the insurrection by conciliation, and when her failure became inevitable, if in the meantime our government had labored itself with the circumspection that has been characteristic of Mr. McKinley's administration, Spain might have been brought to see that her interests and her dignity would be best protected by our mediation. But it is clear that she cannot be bullied into asking for our assistance, and, judging from recent news from Cuba, it is going to be very easy to bring on a war.—[Harper's Weekly.

STATE VERSUS FEDERAL COURTS.

Test Case in Kansas to Determine Their Relative Authority.

TOPEKA, Kan., Oct. 15.—In order to test in the court of last resort the right of a federal judge to interfere in the execution of the laws of a sovereign state, Webb McNall, superintendent of insurance, has exposed himself to the wrath of Federal Judge Williams, and takes chance of imprisonment for contempt by a deliberate violation of the court's order.

Judge Williams recently issued an order to force Commissioner McNall to issue to the Mutual Life Insurance Company of New York a license to operate in Kansas upon payment of the usual fee. Yesterday John E. Lord, general agent of the company, tendered the fee and demanded the license. Mr. McNall announced his purpose to disregard Judge Williams's order, and rely upon the Supreme Court of the United States for a writ of habeas corpus in case of imprisonment for contempt. The issue between the state and federal judiciary is now complete, and a fight on that will result in settling once for all the relative authority of the contestants.

DEVISED BY DINGLEY'S ENEMIES.

Charge That the Hadley Breach of Promise Suit was a Political Scheme.

SAN FRANCISCO, Oct. 15.—W. E. Hadley of San Diego says that the recent breach of promise suit at Auburn, Me., in which his wife was the defendant, and Arthur Melcher the plaintiff, was simply a political scheme devised by the enemies of Congressman Dingley, who is a relative of Mrs. Hadley. He declares that Judge Wing, who was Melcher's attorney, is a strong political opponent of Mr. Dingley, and that Mrs. Hadley will return to Maine, appeal from the judgment against her and fight it out in the supreme court.

UNDER THE REFORM RULE.

Cuban Autonomist Recommends Candidates for Office.

MADRID, Oct. 15.—Senor Gamoga, a prominent leader of the Cuban autonomists, has arrived here incognito, and has had a conference with the minister for the colonies, Senor Maisi, at which the former recommended candidates for posts under the proposed Cuban reform administration. Among the names suggested by Senor Gamoga for an appointment was that of Senor Bruson, a distinguished lawyer of Havana.

PLANTS AND BULBS.

Floriculture for the House During the Winter Season.

We often hear it said of some woman whose house plants are particularly flourishing: "Oh, she has such good luck with flowers! If she were to stick a match in a flower pot it would take root and grow!"

Now, it would be going too far to say that there is "no such thing as luck," as some people do. That is absurd. The lucky person is he who is born with brains enough to make the best use of favorable circumstances if they exist, or to create them if they are lacking. This applies to floriculture as well as to any other human undertaking. Conditions must be *right*, or the result is failure. Sometimes one fails through ignorance or indifference—that is bad luck for the plants. Sometimes the conditions are beyond one's power to change—that is bad luck all around. First consider if you have even one sunny window which you can give up to your plants; then, by following some simple, sensible directions, you may have one lovely verdant corner to make the shortest, darkest winter day less dreary.

Perhaps you have in the garden a lot of geraniums, heliotropes and other bedding plants which have grown almost too large for house plants, and yet it seems somehow ungrateful and shabby treatment to let them freeze after all they have given you of beauty through the long summer. It is not too late to start slips of the finer sorts in boxes of soil or jars of water in some sunny window, to be potted for winter blooming, and these will do much better than large plants that have been blooming all summer. The large geraniums may be planted in boxes and kept in the cellar for spring planting out of doors, however. The tops will die, but the plant, with a little water now and then, will come up finely when it finds itself again in the garden bed.

Prepare the soil for potting plants with equal parts of leaf mould, compost and garden loam, mixing in a little sand. Always cover the bottom of the pots, boxes or whatever receptacle is used with from one to two inches of shards, pebbles, cinders or scrunching of the kind for drainage. If you are not needing much soil, it would be best to buy it ready mixed of a good florist when convenient.

Some Good House Bloomers.

For house use all the year round there are other known sorts to be added to the list of plants, highly recommended for beauty and ease of culture. The Chinese primrose is one of the most popular favorites. Both flowers and foliage resemble the primrose in that of azalea, though much smaller, of course. It can be grown as a window plant, but by "planting back" early in June in some partly shady border, and lifting and potting with good soil before frost, one has a fine specimen of spray of delicate, shaded blossoms after the weather is cold and very severe. The new varieties of begonia are superb. The gloxinia or Paris daisy is a certain and showy bloomer. If you have in your garden the white and blue, or all the colors of the primrose, you can grow them in pots for winter blooming. Indeed, anything that grows and will bloom when tended in the garden will bear transplanting to the house. Mignonette, whose perfume is better than the sweetest flower.

The Chinese Hydrangea [illegible] a society just introduced. As it [illegible] grows to large shrubs of [illegible] inches in size which the first [illegible] These plants [illegible] blooming the plant exceedingly [illegible]

The Hydrangea [illegible] for a [illegible] Arborea petiolaris. My own [illegible] but is difficult to manage [illegible] as a recommendation [illegible] is still so. It easily [illegible] pot during [illegible] vigorous [illegible] shoots [illegible] the central [illegible] shoot two [illegible] sets [illegible] Subsequent [illegible] would be impossible to [illegible]

The gold-dust or cape jessamine, [illegible] other rare, though not new, plant, and will reward proper care with its exquisite, waxlike flowers, the favorite boutonnière of masculine swelldom.

Roses are so difficult to manage indoors that the inexperienced would do well to leave them alone. Still, if one wishes to try the experiment, with a few hints are the names of some of the less difficult: Princess Beatrice, deep pink; Hermosa, pink; La France, pink; The Bride, white; Pearl of the Garden, yellow; American Beauty, crimson; The Meteor, red.

Bulbous Plants.

But for house culture, far and away beyond all others in point of certainty, variety and beauty are the bulbous plants—hyacinths, tulips, lilies and narcissus, in all their wonderful diversity of form and color, and many others, new and old—so many, and so beautiful, that a choice becomes almost impossible. Best of all, the conditions required for successful culture of most of these are within reach of almost every one. There is no mystery about the matter—follow a few simple directions and you are bound to succeed.

Select your bulbs with great care, as you would all promised excuse the people with whom you were to be in intimate relations for months to come. Buy the "named" hyacinths, or at least the higher priced bulbs, as recommended for window or wing. Use the broad, shallow pots, not forgetting the layer of drainage material in the bottom, and filling up with good, porous garden loam, to which a liberal encouragement of bulk of coarse sand has been added. Set several bulbs in each pot; don't be afraid of crowding them—they like it but plant preferably all of one kind in a pot, as they are more sure of coming into bloom at the same time. Don't plant them quite down! Set each in a little bed of sand, leaving about half the bulb above the surface.

The same rule applies to the larger kinds of narcissus. Small bulbs must be covered, though not very deeply. Scarcely all need be kept in a dark, cool place until well rooted; they must be watered occasionally but not too freely. Be patient in waiting for signs of growth. Some bulbs require only a few weeks, others two or three months, before they are ready to come to light. Wait until the foliage and buds are well grown. The former will be white and yellow, perhaps, but that does not matter. Wait! When the flower stalks have grown up, then as the time to bring some hyacinths, etc., gradually into the sunlight. The foliage will take green which forty-eight hours. The cellar is a good place to start bulbs in, if not too warm. If too light, turn a box over the pots. A very good way to start bulbs is to plunge the pots in the flower beds, covering several inches with soil. Keep them there until very cold weather sets in, then bring gradually to light and warmth.

Bulbs in Water.

Both the hyacinth and narcissus may be quickly and easily raised in water. For the former procure the glasses that are sold for the purpose. Fill with soft water, putting a piece of charcoal in the bottom to keep it sweet. Choose fine, solid bulbs and set them so that the water barely touches the bottom. Add water as needed, but do not change it unless it becomes foul. Keep the glasses in a dark closet, or even in the sideboard, until the white, thread-like roots nearly fill the glass. Then bring to the light. Every one knows the Chinese sacred lily, and how to bring the bulbs into bloom by planting in bowls of water on a bed of pebbles. Not every one knows that this so-called lily is a species of narcissus. A few eligible for favor is the scarlet Mexican lily, which is best grown like the Chinese sacred lily, in shallow pans of water and pebbles.

A little more difficult to manage, but worth any amount of trouble, is the fuchsia. No description can give one who has not seen it an idea of the peculiar beauty of this charming flower. It must be seen to be appreciated. By all means include several pots of fuchsia in your collection.

Buy the best bulbs you can procure—white, yellow or scarlet; put several in a pot, but do not mix them, as they vary in time of development. Four or five months are usually required to bring them into bloom. Keep them in the dark until the foliage begins to appear, never allowing the soil to become dry. Unlike most other bulbs, they must now be placed in a sunny window. Keep the pot sitting in a dish of water, as they need a constant supply. Wait patiently, and you will be rewarded beyond your expectations. They are superb.

Other less familiar plants recommended for house culture are the cyclamen, gloxinia, ixiolirion, freesia and anemone. By all means try "something new" this time in making up your window garden. You will get a great deal of pleasurable excitement from your experiments, if nothing more.

Easter Lilies.

Few people gazing with admiration upon the display of Easter lilies in the florists' windows realize that to possess one or more such branches is within the grasp of every one. With a very small outlay of money and care. The Easter lily now so-called is the Bermuda lilium harrisii.

Bulbs may be had at prices ranging from ten cents upward. A very good size may be had for fifteen or twenty cents. An ordinary flower pot, the size suited to the size of the bulb, allowing two inches space at the sides, and rich garden soil, and a generous layer of cinders at the bottom—that is all that is required to begin with. Plant the bulb about two inches deep, water well and start in a dark, cool place, as you do other bulbs. When it begins to grow, give it a sunny, permanent place, where it will not be disturbed by [illegible] of temperature and do not [illegible] This is all. Surely no one [illegible] when a little effort will produce [illegible]

Suitable For Christmas Presents.

TO CURE NERVOUS DYSPEPSIA.

To Gain Flesh, to Sleep Well, to Know What Appetite and Good Digestion Mean, Make a Test of Stuart's Dyspepsia Tablets.

Interesting Experience of an Indianapolis Gentleman.

No trouble is more common or more intense and that serious dyspepsia. People have got to think that their nerves are to blame and are surprised that they are not cured by nerve medicine and spring remedies; the real seat of the trouble is lost sight of; the stomach is the organ to be looked after.

Nervous dyspeptics often do not have any pain whatever in the stomach, nor perhaps any of the usual symptoms of stomach weakness. Nervous dyspepsia shows itself not in the stomach or muscles as nearly every other organ seems to receive the least palpitation and it is irregular. In others, the kidneys are affected; in others the bowels are constipated, with headache; still others are troubled with loss of flesh and appetite, with accumulation of gas, sour feelings and heartburn.

Mr. A. W. Sharpe of No. 11 Prospect St., Indianapolis, Ind., writes as follows: "A feeling of pure gratitude prompts me to write these few lines regarding the near and valuable medicine, Stuart's Dyspepsia Tablets. I have been a sufferer from nervous dyspepsia for the last four years, have used various patent medicines and other remedies without any favorable result. They sometimes gave temporary relief until the effects of the medicine were off. I attributed this to an sedentary habits, being a bookkeeper with little physical exercise, but I am glad to state that the tablets have overcome all these obstacles, for I have gained in flesh, sleep better and am better in every way. My advice is written not for notoriety, but is based on actual fact."

Respectfully yours,
A. W. SHARPE,
11 Prospect St., Indianapolis, Ind.

It is safe to say that Stuart's Dyspepsia Tablets will cure any stomach weakness or disease except cancer of stomach. They cure sour stomach, gas, loss of flesh and appetite, sleeplessness, palpitation, heartburn, constipation and headache.

Send for a valuable little book on stomach diseases by addressing Stuart Co., Marshall, Mich.

FOR THE PRESENT . . TION.

Arrangements for Monday's Ceremony on Gunboat Newport.

Another meeting of the gunboat Newport reception committee was held in the mayor's office last evening, when arrangements were completed for the formal presentation of the silver service to be given by the citizens of Newport to the vessel and other exercises connected with the ship's visit here.

It was reported by Colonel A. C. Landers that the executive committee of the Casino had offered the use of the club pavilion at the Casino for the reception to Commander H. P. Tilley and the officers of the Newport, Monday evening. The offer was accepted and the thanks of the committee extended to the Casino authorities for the use of the house. A committee consisting of Mayor Boyle, Colonel Landers and Messrs. Murphy, Hatte and Peckham was appointed to arrange for this portion of the entertainment in connection with the presentation.

A program for the formal presentation of the service and the reception on the ship, prepared by Rear Admiral S. B. Luce, U. S. N., was adopted as follows: The service will be taken to the ship in the morning by a sub-committee consisting of Commissioner Ball and Postmaster Young, and delivered to the commanding officer. In the afternoon at 1:30 o'clock the committee will meet at the Training Station landing and there be conveyed in launches to the gunboat, the guests leaving ten minutes later from the same place. Arriving on the vessel the members of the committee will be presented to the commanding and other officers of the Newport, and the guests will be similarly received in turn. The formal presentation will be made by His Honor Mayor Boyle and the service will be received by Commander Tilley. These formalities being concluded, the gunboat will be inspected by the guests, and at 4 o'clock boats will be ready to take the visitors ashore. The Naval Station band will furnish music during the afternoon. The reception at the Casino Club rooms in the evening will be from 8:30 to 10:30 o'clock.

It was announced that the Old Colony Steamboat Company has given permission for the gunboat to be brought to Long wharf, and that Commander Tilley has consented to the plan that the school children of Newport be afforded an opportunity to inspect the vessel; a plan arranged by Secretary Abbott, for the visit of the pupils of the St. Mary's and Hazard Memorial schools in the morning and of those of the public schools in groups in the afternoon, will be submitted to those in charge of the schools for approval.

Congressman Bull has requested Governor Dyer to ask Col. Josiah Parker of the Newport Artillery to have the company's gun squad fire a salute of twenty-one guns on the arrival of the Newport. The vessel will arrive here tomorrow and is expected to remain until Wednesday of next week, when she will go to Providence.

CURING THE TOBACCO CROP.

Methods Outlined in a Bulletin From the Department of Agriculture.

"Methods of Curing Tobacco" is the title of a bulletin prepared by Milton Whitney, chief of the division of soils of the Agricultural Department. The bulletin is considered especially appropriate just at this period, as the tobacco growers are nearly ready to cure house and cure their crops. Interesting information is contained in the pamphlet regarding the methods in vogue in Virginia, Maryland, North and South Carolina and Tennessee. The tobacco grown in Maryland and on the heavier soils of Virginia and North Carolina is used both for manufacturing purposes and for other trade. Tobacco has been a staple article of produce in Virginia and Maryland since the very earliest colonial times, and it forms a very interesting part of the history of the development of the two states. Large quantities were formerly sent to France, Holland and Belgium, and it was highly thought of for pipe smoking in our domestic trade. It is a bright, mild and sweet-flavored tobacco for pipe smoking. In recent years, however, the White Burley has been coming into great favor for the same purpose that the Maryland and Virginia tobacco was formerly used for. The very much larger yield of White Burley has lowered the price of the Maryland and Virginia tobaccos almost below the point of profitable production.

The process of curing these tobaccos is essentially as follows: When ripe, the stalks are cut and split lengthwise and laid on the ground to wilt. They are then strung on sticks, four or six on a stick, and the sticks are hung on a low scaffold in the field. Within a week they are hauled into a well-ventilated barn, hung in tiers, and cured without the use of artificial heat. The process of curing must be gradual to produce a good and uniform color. This is regulated by the ventilator doors, according to the temperature and the humidity of the air. The crop can usually be cured in six weeks. The leaves are stripped from the stalks during the winter, graded as fresh, fine and bright, medium and dark leaf. These are tied into hands and baled down for a short time, after which they are prized into hogsheads. The crop goes through a certain amount of fermentation in the bulk, and it must be examined occasionally to see that the temperature does not run too high. When it does, sometimes happens if the tobacco is in good condition when it is put down, the bulk is turned over and a new one built up.

In Virginia, however, there are districts where certain modified methods have been used to such an extent as to give character to the leaves. These are local methods, however, and are not as prominently recognized now as they were a few years ago.

Bright Yellow Variety.

The bright yellow tobacco of southern Virginia, North and South Carolina and east Tennessee is grown upon a certain type of very sandy soil. The planting is usually done from the 15th of May to the south of June. The [illegible] to [illegible] from eight to twelve leaves, depending upon the vigor of the plant and the character of the season. The more vigorous the plant and the wetter the season the more leaves can be left on to mature. The plant is regularly suckered, once a week if need be. There are various methods of harvesting the crop. Sometimes the entire stalk is cut, as with other tobaccos, only those which appear to be ripe being taken and the others being left to mature further. Sometimes the leaves are picked off as they mature and the rest of the plant is allowed to run further.

The second method has a decided advantage, from the fact that the leaves of a plant do not ripen at the same time. There is less waste and the leaves are all gathered at about the same stage of maturity. The plant should be thoroughly dry when cut, in order to give the finest texture and the brightest color. If the whole plant is cut it is sorted into a stick, or, if the leaves only are stripped as they ripen, they are strung on a string or wire and attached to a lath. The leaves are sorted to a certain extent in the field, keeping those of a uniform color and ripeness together as much as possible. When cured, the tobacco is carried at once to the shed without exposure to the sun or weather, allowing it to wilt as the green tips proceed.

The tobacco barns are tight, with doors opening across a short distance from the ground and returning in the opposite direction, which is built next to the furnace. In early days barns were built of logs, with the cracks completely stopped with mud or clay to make them perfectly tight. The barns are usually small, accepting from sixteen to twenty-five feet square, and of about the same height to the plate. Frequently as many as eighteen to twenty of these barns are built together in a plantation, but never closer than about one hundred feet apart, on account of the great danger from fire. There are quite a number of different forms and of different flues and other arrangements for distributing the heat, many of them peculiar, and all of them described with more or less minuteness in tobacco literature.

Heat Quickly Distributed.

The flues to bring in the heat from a stove as quickly and as directly as possible, so that the drying process may begin promptly, so that the leaf will absorb little moisture from the air. Nevertheless, a tobacco barn is very often [illegible] for the purpose, frequently under the [illegible] of some person who has supplied him with the stove.

When the first stage is reached the temperature is kept on a level with the outside air, and is carefully watched day and night, while at the same time the ventilators themselves are carefully and frequently regulated. The heat must be increased very gradually, but it must never on any account be checked. It must never be allowed to cause scorching. The first process in the curing is to maintain a temperature of 90 to 95 degrees until the leaf is yellowed properly. This requires from eleven to thirty-six hours, and must be very carefully managed. After the yellowing the heat is raised five or ten degrees at a time, and held at each stage for one or two hours, until it has attained a temperature of 115 degrees to 120 degrees, where it is held for several hours until the leaf is thoroughly dried. After this the stalk and stem is dried by raising the temperature to 150 to 175 degrees, by means of which the stem is dried as per hour, and keeping the temperature at this point until the stem is thoroughly cured.

Dampness Injures Color.

After the drying the barn is opened and the leaves are cool, and after [illegible] hours the leaf is usually in order for removal. It should not be gathered in very damp weather, as this is supposed to injure the color; but if the air outside is too dry a little wet straw may be thrown over the fires in order to slightly moisten the atmosphere of the barn. The tobacco is then taken down and bulked on the sticks in piles. It is left in this way for several days to straighten out the leaves and improve the appearance. It is then rehung, being crowded very close to prevent injury, as far as possible, from atmospheric changes, as it may be bulked down permanently to keep it in order for stripping.

The leaves are stripped from the stem and tied into hands after being sorted into six or eight grades of wrappers, fillers and smokers. The tobacco is then bulked down and left for one or two months, when the color becomes fixed and the slight greenish tinge which was left on removal from the barn is removed. The color is then no longer subject to change. Much of the tobacco is carried loose to the warehouse and sold in the open market. Some of it is packed in small hogsheads and shipped.

It is said to be very necessary to grade the tobacco properly, according to the character of the leaf and its color. (Washington Star.

AMERICAN MEATS ABROAD.

Secretary Wilson of the Department of Agriculture has received, through the Department of State, two communications of great interest to meat producers. One is from Minister Leishman of Berne, Switzerland. It states that the Swiss federal council, at request of this government, had promised the withdrawal of certain charges calculated to prejudice consumers against American meats, which were published last May by the Schweizerische-Spezerie, Handels and Gesellschaftszeitung. Although this is an unofficial journal, for whose utterances the Swiss federal council repudiates all responsibility, the council, nevertheless, communicated to the editors of that journal the protest made by the United States minister, and transmitted to it the official reply to their charges received in the Department of Agriculture by Dr. Salmon, chief of the bureau of animal industry. Upon these representations the newspaper in question, with commendable promptness, has acknowledged the receipt of the department's communication, which it publishes in full, adding a request that all Swiss papers that have discussed the subject will do likewise. The Department of Agriculture thus promptly and effectually vindicated American meat products from baseless and injurious charges by means of the hearty co-operation of the Department of State and our representative at Berne, and the courtesy of the Swiss government and the fairness of the Swiss journal referred to.

The second communication is from General Draper, United States minister at Rome, and conveys the information that the objectionable exaction imposed on shipments from the United States, by which certificates of inspection required the use of Italian consuls in this country, will very shortly be removed. It seemed at last that the Italian government people had to make use of any concession in this matter on its part as a lever to secure some moderations of our tariff regarding Italian products. This exaction of the kind in the case of American meats was very costly and decidedly annoying, but such regulations having existed in the case of many imports from other countries than the United States, that the representations of our government have finally proved successful in securing its removal.

ILLUMINATING NIAGARA FALLS.

Niagara Falls is a quiet town at all times, but here attempts have been made recently to provide entertainment for visitors by lighting up the great cataract at night. Hitherto these schemes have not succeeded to any startling extent. Electric search lights on the falling sheets of water have not yet been tried on a big enough scale, and the recent attempts with the new and brilliant searchlights have not been quite what was expected of them. A power company has been experimenting with the Falls for some time, and the Niagara Falls Power company, whose headquarters are at the Whirlpool rapids, has also been experimenting with searchlights. So far failure seems to be the result. Lights will not reveal the beauties of the falls from the land and water, which are best seen by daylight, but they will reveal the rapids and falls. Hence the attempts to use searchlights on both sides will continue. Under the auspices of the Niagara Falls Park and River railway, which has the only practical right from or to the Canada side, the Canadian Falls will be illuminated by searchlights.

NEWPORTERS AT NEW BEDFORD.

Naval Reserves Won on a Protest, and a Battery Man Badly Hurt.

The public exercises in connection with New Bedford's semi-centennial celebration were brought to a close yesterday afternoon with the whaleboat race, the Naval Reserve cutter race and the drill by light battery F. The whaleboat race was a very exciting affair. Ten crews started together, but owing to fouls and other causes only six finished, that from Irons-no's oil works winning.

The Naval Reserve race was a fizzle. Here is what the New Bedford Mercury says of it:

"The cutter race between the crews from the Newport Naval Reserves and the New Bedford seamen did not come off. Instead an exhibition race was rowed, the crews going over the course against time. The trouble arose over the fact that the local crew had provided themselves with a cutter which was particularly adapted to racing, for which purpose it was built. The Newport crew objected to rowing against this craft, claiming it was a racing shell, while their boat was a regulation cutter.

"Both crews pulled to tug Hart, where the coxswains, Daniel Richardson from the Newport crew and David G. F. Ward of the local company, met with the committee on athletic sports. These gentlemen decided to rule out the boat in which the local boys were prepared to pull, on the ground that it was not a regulation cutter, as the Newport coxswain claimed was stipulated.

"Three propositions were made—one that both crews row in the Newports' cutter against time, another that the Newport crew with ten men pull against twelve men of G company in monitor Amphitrite's cutter, and a third that the race be made between the Newports and a crew from the monitor. The first two were out of the question, as the local crew were determined to stick to their boat, and as the Amphitrite's crew, under command of Coxswain C. B. Iverson, had returned to the monitor, the third had to be abandoned.

"Finally the crews pulled over the course as an exhibition. The time for the course was: New Bedford Naval Reserves, 18 minutes 23 seconds; Newport Naval Reserves, 19 minutes 15 seconds."

The drills by Light Battery F, of Fort Adams, have proved very attractive each afternoon, it being roughly estimated that, except on the first day, when the drill took place earlier than was announced, fully ten thousand people have seen the exhibition daily. The drill yesterday was marred by an accident to Corporal O'Brien, which is explained in this morning's Mercury as follows:

"The drill was much enjoyed by the crowd, and was drawing to a conclusion when an unfortunate accident took place. The company was wheeling in platoons, and when near the southern end of the grounds one of the limber wagons and the carriage on which was mounted one of the 3½-inch rifled guns, was seen to turn completely over.

"The horses attached to the wagon commenced to act badly, and such a kicking as they started has not been seen since the ball season came to a close. It was seen by the spectators that some bad accident had happened, for a dozen or more of the company jumped from the other guns and ran to the overturned gun, and were seen to lift two men to one side. One of the men, Corporal Jack O'Brien, was found lying unconscious under the wagon, and was carried as quickly as possible. Private Harry Miller was thrown clear of the overturning gun and escaped with a lamed side and general shaking up.

"The horses of the limber carriage, the one that went over, were on a dead gallop. The wheels of the gun carriage struck a good-sized rock and the carriage bounded in the air, and when the wheels struck the soft ground again the whole affair turned over. Corporal O'Brien was on the south side, and the gun as it struck the ground crushed into his right leg, and every bone near the ankle was broken. Miller, who was on the other side of the gun, was thrown clear of the overturning carriage. The horses, in plunging about, broke the heavy pole and snapped the single and double trees, which were of strong steel, and also tore some harnesses.

"Dr. Sheehy, who was watching the drill, was hurried to Corporal O'Brien's aid, and after he had been laid out on a mattress, took off the soldier's shoe and made the broken limb as comfortable as possible. The injured man was carried to St. Luke's hospital, where the bad fracture was reduced, and last evening he was reported as being comfortable.

"This is the second time that Corporal O'Brien has had his leg broken in the service."

AROUND RHODE ISLAND.

President Charles P. Clark and other officials of the New York, New Haven & Hartford Railroad Company arrived in Providence yesterday on an official inspection tour, and it is expected that before they departure the question of train sheds at the new railroad depot will be settled.

Ex-Mayor Frederick C. Sayles is now mentioned in connection with the Republican nomination for mayor of Pawtucket. It is thought that Mr. Sayles's nomination would unite the Republicans, whose support seems to be divided among a number of candidates.

Rev. Alexander McGregor of Pawtucket was elected a corporate member of the American Board of Commissioners for Foreign Missions at the meeting in New Haven yesterday.

Burglars entered two stores in East Greenwich Wednesday night, but were frightened away without securing a large amount of booty. Hon. Samuel W. K. Allen, hearing an unusual noise in the neighborhood, looked out of a window of his house and was fired at by the burglars, the ball striking an electric light pole near the house.

Mrs. McGuinness, wife of Mayor McGuinness of Providence, who was nominated by the Republicans for school committee, declines to accept the honor.

The Democrats of several of the wards in Providence at their caucuses last evening endorsed Republican nominees for places on the school committee. The chief interest in the caucuses was in the Tenth ward, where the friends of Alderman James H. McGann won a notable victory over the McNamee faction.

Mrs. Elisha Dyer, wife of Governor Dyer, was injured by a fall while visiting in Lenox Tuesday. She fractured the small bone of the leg near the ankle and will be confined at home for some time.

The new building at the Kingston Agricultural College to be used for a drill hall and dormitory is practically finished and has been accepted by the committee. The new building, which will not be dedicated until after the meeting of the board of management in November, will be known as the Charles Warren Lippitt Hall.

The census of the state institutions for the month ending October 12 shows a decrease of 36 inmates from the number reported in the several departments during the previous month, the total number being 2,185. The decrease has been in the Providence county jail, state prison, state insane asylum and the Oakland school for boys. The increase was in the house of correction, state almshouse and Sockanosset school for boys. There are 1,120 men, 602 women, 328 boys and 68 girls in the several departments.

MENHADEN PLENTIFUL IN BARNSTABLE BAY.

For the first time in many years menhaden have this fall struck into Barnstable bay in large numbers, and nearly twenty thousand barrels have been captured by visiting porgie boats. A dozen menhaden steamers are engaged in the fishery, and last week's catch by the fleet was very large. Had the menhaden fleet arrived a week or two earlier a big harvest would have been reaped, for the schools were more plentiful and contained more fish than now.

MISS HARRIET S. CRANSTON.

To the Editor of the News:

If you will kindly allow me a little space in your paper, I would like to say a few words out of respect to those who today carry out from their home a dearly loved form, and in loving memory of her who has gone. In the death of Miss Harriet S. Cranston there has passed from earth to the spirit land one of those gentle, loving and cheerful souls of whom the world needs more today. We are accustomed to eulogize those who are prominent in public life, but her mission was in the home, where she was a prominent figure, about which all the home machinery revolved, both as a daughter and as a sister. It was our want to meet and part with friends most affectionately, and, true to herself, when after some weeks of sickness it was apparent to all that she could not recover, standing on the threshold of eternity she left messages of love to all her friends and waved an affectionate farewell to the dear ones about her. Time never quite heals these dear wounds when such tender ties are broken, but we shall never have any but pleasing memories of this departed one.

H. B. P.

Newport, R. I., October 14, 1897.

PORTSMOUTH.

[Regular correspondence of the News.]

The literary meeting of the Epworth League was held October 12 with Mrs. Mary Ann DeBlois. The opening exercises consisted of singing and the reading of Psalm XIX and prayer by Rev. J. N. Geisler. The program for the evening was "A Study of the Picket Line of Mission," the first book in the League reading course. The introductory chapter was read by Mr. Thomas D. Fuller. Chapter first, "Life of David Livingston," written by Miss Ida T. Fuller, was read by Mr. William F. Brayton, followed by singing by the League; chapter third, "Ion Keith Falconer," by Miss Lottie F. Grinnell; chapter fourth, "Sia Sek Ang," by Mrs. William F. Brayton; vocal solo by Miss Katie B. Fish; chapter fifth, "John Kenneth Mackenzie," by Miss Belle F. Fish; chapter seventh, "Mary Reid," by Miss Ella D. Chase; and singing by quartet, "One Day Nearer Home."

At St. Paul's Church the morning service will hereafter begin at 11 o'clock, followed by the Sunday school. For the present, at least, there will be no second service.

Mrs. J. Sturgis Pearce is spending some weeks in Maine.

Mrs. Charles B. Ashley and daughter and Mrs. Joseph H. Cross and son were guests Thursday of Mrs. Edward M. Chace.

Mrs. Pierce and daughter of Tiverton have been guests of Mr. and Mrs. John L. Borden.

The Ladies' Benevolent Society of the Methodist Episcopal Church met with Mrs. Elijah L. Tallman Thursday.

Mrs. Perry G. Randall has been quite ill for the last few days.

Mr. John Borden of Tiverton is guest of Mr. and Mrs. Albert W. Lawrence.

Sunday morning Mr. Samuel H. Hailey will begin a three days' gospel meeting at the Friends' meeting house. There will be three services each day, beginning at 10 a. m., 3 and 7:30 p. m., with free entertainment for those from abroad.

Miss Hattie Burdick, who has been spending the summer here, has returned to her home in Somerset.

Rev. William Miller made the address of welcome at the forty-ninth semi-annual convention of the Westport Sunday School Association, held in the Christian Church, North Westport, October 11.

GAUL'S "ISRAEL."

Given with Success at the Church Choir Guild Festival.

The festival of the Newport Church Choir Guild attracted to the Zabriskie Memorial church last evening an audience that filled the auditorium. The festival was devoted to the rendition of Alfred H. Gaul's "Israel in the Wilderness," which, although perhaps of a less popular nature than some of the music previously given by the guild, afforded excellent opportunities for artistic rendition, describing in the development of its theme the wandering of the people of Israel in the wilderness, in a pathetic, sentimental manner. The chorus, which was larger than ever before and contained many who have been accustomed to solo work, was the best ever gathered for a festival of the guild, and the rendition was of the highest character of church musical work. Miss Cora Gosling's voice and action were admirably suited to the soprano part, and the solo work of Mr. Walter J. Towne of Providence, the tenor of the evening, and Mr. Stephen Townsend of Boston, the baritone, was especially agreeable. Mr. Freeman's organ accompaniment was as usual of high order, and Mr. G. Everett Hill, who conducted the festival, again showed his excellent qualifications for this work, the chorus singing in excellent harmony with his direction.

A HARVEST FESTIVAL.

The annual harvest festival at the United Congregational Church, with an appropriate address by the pastor, will be held Sunday evening at 7:30 o'clock. The quartet will render the following program:

Organ prelude, Andante from Symphony, No. 38, Mozart
Anthem, "Rejoice in the Lord," Four
Hymn, "Praise to God, Immortal Praise," Welsh
Gloria Patri (Chant).
Anthem, "Ye Shall Dwell in the Land," Stainer
Hymn, "Come Ye Thankful People, Come," Elvey
Offertory anthem, "The Earth is the Lord's," Simper
Anthem, "Roman Eat," Barnby
Anthem before Lyon, "Sweet Hour of Prayer," Bradbury
Recessional March, Thorne

LOCAL BRIEFS.

—Mrs. W. E. Mumford is at Block Island.

—Mr. and Mrs. Warren Leland, Jr., are at Long Branch.

—Captain Frow B. Garrett has returned from his vacation.

—Miss Josephine Perry has gone to New Bedford for a week.

—Mr. and Mrs. John Myers have returned from Brooklyn and other places.

—Polly Lawton Council, Daughters of Liberty, gave a well-attended social in Southwick's Hall last night.

—Bishop Clark of Rhode Island, who spent the summer near the East river, returned to Providence yesterday.

—Mr. C. de La Roche-Francis, who has been spending three weeks on the Hudson and in the Catskills, has returned to Newport.

—Mr. George Peirce, who is slowly convalescing, will leave Monday for Poland Springs, Me., for the purpose of recuperating his health.

—On account of the funeral of Mrs. Atherton Blight Mr. Victor Heigel's concert at Mrs. Hunter's was postponed till tomorrow morning at 11:30 o'clock.

—At Mr. E. Y. Mason's first organ recital of the season in the Baptist Temple Fall River, October 23, he will have the assistance of Mrs. Frazier, soprano of the First Baptist Church, and Mr. Nathan Dewell, baritone.

—The two daughters of Mrs. William D. Sloane, Jr., will entertain for them in her new home in New York. Their mother, Mrs. W. D. Sloane, is still in deep mourning for Mrs. W. H. Vanderbilt.

—The Holy Name Society of St. Joseph's Church, which has been looking for a suitable hall for the winter, has decided to remain in its present quarters in the basement of the Hazard Memorial School. The feeling was strong that a larger hall would be better for the gymnasium work which it is proposed to have, but as favorable arrangements could not be made the work will go on in the old quarters. It is hoped, as successfully as in a larger place.

QUEEN VICTORIA AND IRELAND.

The disclosure made by Lord Tennyson, in his biography of his father, that Queen Victoria did not sympathize with Mr. Gladstone's home rule policy for Ireland, does not come as a surprise to the friends of Ireland. It merely confirms what was the general opinion in Irish circles when the question was before Parliament. The queen, as at all times, was guarded both in word and action at that time, but the Irish leaders inferred from a certain feature of her extreme caution that her sympathies were not with them, and judged her accordingly. It is now shown by the printing of her letter to Tennyson that they judged her correctly.

The matter is of interest only because of the agitation of the question at this time of building a residence for royalty in Ireland. The Duke and Duchess of York during their recent tour in the island were very cordially received by the people, and the circumstance was made the basis of a suggestion that if the Irish people could enjoy the opportunity of seeing more of the reigning family there would be more content in Ireland with English rule. This view of the queen's may impair somewhat the force of that suggestion.

But the suggestion is largely fanciful. It does not reach the real difficulty at all. Ireland has never complained of the neglect of royalty in the matter of the absence of royalty from her borders. Her denial has been, not for the presence of the queen or any member of her family, but for the presence of a parliament at Dublin, sitting with the authority to inquire into Ireland's wants and provide for them. She has asked for home rule, not for glittering pageantry. Absentee landlordism has been a factor in the Irish question, but absentee royalty never.

The queen, this letter serves to recall, has never been an ardent admirer or supporter of Mr. Gladstone. Several explanations for the fact have been offered, and so, in Mr. Gladstone's interests, has been that he was never sufficiently a courtier to suit the queen. His obedience as a subject was perfect, but his manner and policies were thought to border too closely on the democratic to compare favorably in the queen's eyes with those of Lord Melbourne, or Lord Palmerston or the Earl of Beaconsfield, who served her in the premiership more after the royal conception of what was called for from the occupant of that office.—[Washington Star.

AUCTION SALES.

Mortgagee's Sale.

By virtue of a power of sale contained in a certain mortgage deed given by George A. Eastman to Holmes M. Jermegan, dated the seventh day of May A. D. 1892 and recorded in Volume of the Land Evidence of the town of Jamestown in the State of Rhode Island at pages 162, 63 and 164, will be sold at public auction upon the premises hereinafter described on Saturday the twenty-third day of October A. D. 1897 at one o'clock in the afternoon that certain lot or parcel of land situate in that part of the said town of Jamestown, known as Conanicut Park and bounded northerly on Bay View Drive easterly on Summit avenue southerly on Highland avenue and westerly on Bay View Place and a line in continuance of the easterly boundary line of said Bay View Place to said Highland avenue as said land and ways are laid down on a plat of said Conanicut Park, made by John H. Shiffin and on file in the office of the town clerk of said Jamestown, together with the dwelling-house and other buildings and improvements on said lot. Also one other certain lot or strip of land, situate in said Jamestown, at said Conanicut Park bounded northwesterly by Narragansett Bay, easterly by Land of the United States government, southeasterly by Bay View Drive aforesaid and southerly by a line formed by prolonging said eastern (or northern as it may be called) boundary line of said Bay View Place northwestwardly to said Narragansett Bay, together with the wharf and other improvements thereon, subject to the restrictions set forth in the deed to said George A. Eastman from Holmes M. Jermegan and wife.

Said mortgagee hereby gives notice of his intention to foreclose upon said property at said sale thereof.

By order of the mortgagee,
HARRIS BAKER, Attorney.
Newport, R. I., Sept. 28, 1897.

Mortgagee's Sale.

BY VIRTUE of the power of sale contained in a certain mortgage of personal property made and executed by John Arnold of the Town of Middletown, County of Newport, State of Rhode Island, to the undersigned, dated September 1st, 1896, and recorded in Vol. 2 of the mortgages of personal property of said Middletown, at pages 200, 201, 202, 203 and 205, there will be sold at public auction on the premises known as the Dutch place, at Easton's point, near Second beach, in said Middletown, on **Thursday, October 21st, 1897,** weather permitting, if not the next fair day, the conditions of said mortgage having been broken, the following articles of personal property mentioned in said mortgage, viz.: 2 bay horses, 1 lap horse, 8 cows, 1 bull, 2 heifers, 2 calves, 5 pigs, 15 tons of hay, 1 stack of corn fodder, 70 bushels of corn, 100 lbs. timothy seed, 1 manure wagon, 1 hay cart, 1 market wagon, 1 covered milk wagon, 1 open top wagon, 1 carryall, 2 mowing machines, 1 horse rake, 1 hay tedder, 1 grind stone, 1 fanning mill, 1 cultivator, 1 hand cultivator, 1 seed drill, 1 harrow, 2 single harnesses, pitch forks, hay forks, etc.
